# IDAHO DEPARTMENT OF LANDS TIMBER SALE PLAN

July 1, 2011 – June 30, 2012

## Types of Sales

### Timber Sales

Timber sales contain an estimated volume of at least 1,000 MBF and exceed the net appraised stumpage value for salvage sales established by the state board of land commissioners. Timber sales are designed to produce maximum stumpage returns to the endowment funds consistent with prudent long-term management practices.

Timber sales are advertised for four weeks in a newspaper in the county where the sale is located, and are sold at public auction.

### Salvage Sales

Salvage sales do not exceed the net appraised stumpage value and volume established by the State Board of Land Commissioners and are intended to be used in the harvesting of timber which, in the opinion of the director, is of insufficient quality and/or quantity to support a timber sale. The contract requirements for salvage sales are the same as for timber sales.

Salvage sales are advertised for one week in a newspaper in the county where the sale is located, and are sold at public auction.

### Direct Sales

Direct Sale net appraised stumpage value does not exceed the maximum value established by the State Board of Land Commissioners. This type of sale is to be used to harvest isolated or by-passed parcels of timber of insufficient value and volume to justify a salvage sale. The direct sale is not used where two or more potential purchasers may be interested in bidding on the forest products offered for sale.

The direct sale of forest product stumpage is made without advertisement as authorized by the Director.

		Pts. SW, Pts. SE	33	64N/4W		
		Pts. N2SW, Pts. SWSW	34	64N/4W		

Estimated Auction: Summer 2011

This sale is located primarily within the Trapper Creek drainage approximately 26 air miles north of Coolin, Idaho in Boundary and Bonner Counties. The sale will be harvested using a combination of small clearcuts, large group selection and group shelterwood methods. Method of harvest will require ground-base and cable yarding with multi-span capabilities. Approximately 1.7 miles of spur road will be constructed, 2.4 miles of spur road reconstructed and 3.8 miles of spur road improved. All roads within the sale will be closed with earthen berms or locked gates after conclusion of sale activities. The East Fork of Trapper Creek and an unnamed tributary of Trapper Creek are both Class I streams and are adjacent to the sale area. Class II streams are present within the sale area.

2	<b>West Wig</b>	Pts. SESE	20	62N/3W	274	1,700 MBF

		Pts. N2	28	62N/3W		
		Pts. N2NE, Pts. NENW	29	62N/3W		

Estimated Auction: Spring 2012

This sale is located within the Two Mouth Creek drainage approximately 17 air miles northeast of Coolin, Idaho in Boundary County. The harvest prescription will involve overstory removal and clearcut methods. Harvesting methods will require ground-base and cable yarding systems with multi-span capabilities. Developments will require the construction of 0.1 mile of spur road, reconstruction of 2.1 miles of spur road and the improvement of 3.0 miles of secondary road. Two Mouth Creek is a Class I stream and several Class II streams are adjacent to the sale area.

3	<b>Lonely Bear</b>	Pts. SENE, Pts. SESW, Pts. SE	10	61N/4W	194	2,000 MBF
		Pts. W2SW	11	61N/4W

		Pts. E2SE	15	61N/4W		

Estimated Auction: Spring 2012

This sale is located within the Bear Creek drainage approximately 11 air miles north of Coolin, Idaho in Bonner County. Harvest prescription will involve a combination of seedtree, overstory removal and clearcut methods. Ground-base yarding will be required on this sale. No developments are required within the sale. Bear Creek and an unnamed intermittent Class I stream are adjacent but not within the sale area. A Class IIa stream is adjacent to the sale area but not within the sale boundary. Gates will be closed and locked after harvest operations.
