# IDAHO DEPARTMENT OF LANDS TIMBER SALE PLAN

July 1, 2012 – June 30, 2013

## Types of Sales

### Timber Sales

Timber sales contain an estimated volume of at least 1,000 MBF and exceed the net appraised stumpage value for salvage sales established by the state board of land commissioners. Timber sales are designed to produce maximum stumpage returns to the endowment funds consistent with prudent long-term management practices.

Timber sales are advertised for four weeks in a newspaper in the county where the sale is located, and are sold at public auction.

### Salvage Sales

Salvage sales do not exceed the net appraised stumpage value and volume established by the State Board of Land Commissioners and are intended to be used in the harvesting of timber which, in the opinion of the director, is of insufficient quality and/or quantity to support a timber sale. The contract requirements for salvage sales are the same as for timber sales.

Salvage sales are advertised for a minimum of one week in a newspaper in the county where the sale is located, and are sold at public auction.

### Direct Sales

Direct Sale net appraised stumpage value does not exceed the maximum value established by the State Board of Land Commissioners. This type of sale is to be used to harvest isolated or by-passed parcels of timber of insufficient value and volume to justify a salvage sale. The direct sale is not used where two or more potential purchasers may be interested in bidding on the forest products offered for sale.

The direct sale of forest product stumpage is made without advertisement as authorized by the Director.

		Pts. NE, Pts. N2SE	8	63N/4W		
		Pts. NWNW	9	63N/4W		

Estimated Auction: Spring 2013

This sale is located within the Trapper Creek and East Fork of Trapper Creek drainages approximately 25 air miles north of Coolin, Idaho in Bonner County. This sale will be harvested using a number of small to medium size clearcuts. Ground-base and cable yarding methods will be required on this sale. Developments will include approximately 0.5 mile of spur road reconstruction. All roads within the sale will be closed with earthen berms or locked gates after conclusion of sale activities. Trapper Creek and the East Fork of Trapper Creek, both Class I streams, are located more than 600 feet from the sale area. One un-named Class I stream and several Class II perennial streams are within or adjacent to the sale area.

## Resale Southwest Idaho Supervisory Area

SALE NO.	SALE NAME	SUBDIVISION	SEC	T & R	APPROXIMATE ACREAGE	VOLUME
1	<b>Huckleberry Resale</b>	Pts. Pts.	1 36	10N/3E 11N/3E	114	1,205 MBF

Estimated Auction: Spring 2012

This sale is located approximately 5 miles south of Smiths Ferry, Idaho, in the Scriver Creek drainage. This sale will utilize overstory removal, seedtree, and commercial thinning harvest prescriptions. Tractor and off road jammer yarding systems will be required. Class II streams are present within the sale area. This sale is a reoffering of the Huckleberry timber sale (TS-60-3589) which was terminated due to hardship. Development work was completed with the previous sale so no new development is required with this sale.

2	<b>South Williams Resale</b>	Pts. S2NE, Pts. N2NW, Pts. NESW, Pts. SW Pts. N2NE	22 27	2N/8E	139	1,640 MBF
---	------------------------------	--	----------	-------	-----	-----------

Estimated Auction: Spring 2012

This sale is located approximately 4 miles east of Prairie, Idaho in the Williams and Dry Buck Creek drainages. A shelterwood harvest will be applied to the entire sale. The sale area will use a combination of tractor and tractor/off road jammer logging systems. This sale will construct 1.54 miles of spur road and 1.18 miles of secondary road and 3.81 miles of spur road will be opened. Williams Creek, a Class II stream, is adjacent to the sale. This sale is a reoffering of the South Williams timber sale (TS-60-3680) which was terminated due to hardship. Harvesting and development work were partially completed with the previous sale.
