IDAHO DEPARTMENT OF LANDS FY16 TIMBER SALE PLAN

July 1, 2015 – June 30, 2016

Types of Sales

Timber Sales

Timber sales contain an estimated volume of at least 1,000 MBF and exceed the net appraised stumpage value for salvage sales established by the State Board of Land Commissioners. Timber sales are designed to produce maximum financial returns to the endowment funds consistent with prudent long-term management practices.

Timber sales are advertised for four weeks in a newspaper in the county where the sale is located, and are sold at public auction. In addition to publication in the county newspaper, the advertisement is also posted to the Idaho Department of Lands timber sales website at:

<https://apps.idl.idaho.gov/timbersale/Search.aspx>

Salvage Sales

Salvage sales do not exceed the net appraised stumpage value and volume established by the State Board of Land Commissioners and are intended to be used in the harvesting of timber which, in the opinion of the director, is of insufficient quality and/or quantity to support a timber sale. The contract requirements for salvage sales are the same as for timber sales.

Salvage sales are advertised for a minimum of one week in a newspaper in the county where the sale is located, and are sold at public auction. In addition to publication in the county newspaper, the advertisement is also posted to the Idaho Department of Lands timber sales website at:

<https://apps.idl.idaho.gov/timbersale/Search.aspx>

Direct Sales

Direct Sale net appraised stumpage value does not exceed the maximum value established by the State Board of Land Commissioners. This type of sale is to be used to harvest isolated or by-passed timber parcels of insufficient value and volume to justify a salvage sale. The direct sale is not used where two or more potential purchasers may be interested in bidding on the forest products offered for sale.

The direct sale of forest product stumpage is made without advertisement as authorized by the Director.

Estimated Auction: Spring 2016

This sale is located within the Trapper Creek and East Fork Trapper Creek drainages approximately 26 air miles north of Coolin, Idaho in Bonner County and Boundary County. This sale will be harvested by using a combination of small to medium size clearcuts, overstory removal and small group select areas. Ground based yarding and cable yarding will be required with multi-span capabilities on this sale. Developments will include approximately 3.0 miles of secondary road and 8.0 miles of spur road reconstruction, 16.0 miles of main road improvement and 5.0 miles secondary road improvement. All seasonal roads within the sale will be closed with earthen berms or locked gates after conclusion of sale activities. Trapper Creek and East Fork Trapper Creek are Class I streams, and not within 75 feet of the sale area. There are several Class II perennial and intermittent streams within or adjacent to the sale area.
