I am pleased to submit the Fiscal Year 2002 Annual Report of the Idaho Department of Lands.

The year began tragically with the crash of a single engine air tanker on July 10 resulting in the death of pilot Doug Gilbert. Doug was making his second drop on the Cottonwood Creek fire in the Salmon River Canyon when an in-flight breakup occurred. He was working for Craigmont Air Service, a long-term contractor providing fire retardant service. Three days later Buck Erickson, the previous owner of Craigmont Air Service, and someone respected throughout the Department for his many years of retardant delivery, died in a crash unrelated to fire suppression. These two tragic deaths are reminders of the risks willingly accepted by Doug and Buck, and those like them, in service to Idaho citizens every year and the debt of gratitude we owe them.

During 2002 the Department initiated a significant reorganization designed to reduce the span of control of the Director and to refocus accountability for our actions at the field level, where key decisions are made.

The Department of Lands has a long history of responsible management of endowment assets to maximize long-term revenue to our trust beneficiaries. That commitment continues and resulted in over \$57,000,000 in endowment revenue during 2002. In addition, Department personnel continued consistent and practical administration of several regulatory programs entrusted to us.

I am especially grateful to the nearly 250 permanent and 200 seasonal employees of the Department of Lands. Without the dedication and hard work of these skilled employees, the accomplishments highlighted in this report would not be possible.

Sincerely,

A handwritten signature in green ink that reads "Winston A. Wiggins". The signature is written in a cursive, flowing style.

The Idaho Department

Managing Endowments...

When Idaho was admitted to the Union as the 43rd state in 1890, it was granted approximately 3,672,000 acres of land for the support of state institutions. The land was granted under the condition that it be managed in perpetuity as a trust for the beneficiary institutions. This mandate was codified in Article IX Section 8 of the Idaho Constitution which states that the lands are to be managed, "...in such manner as will secure the maximum long term financial return to the institution to which granted." Chief among the beneficiaries are the public schools which received two sections of every township in the state (1/18 of the total land base). Other institutions include the University of Idaho, the Agricultural College, the Normal Schools, Penitentiary, Charitable Institutions, State Hospital South, School of Science and Public Buildings (now Capitol).

Management activities on state endowment trust land are not intended to benefit the general public, but as noted above, are directed solely to the good of the beneficiaries of the original land grants. Money generated from the management of these lands is deposited into the earnings reserve fund from which the costs of management and payments to the beneficiaries are made. Revenue from the sale of land and from mineral royalties is deposited into the permanent endowment funds which are invested by the Endowment Fund Investment Board. The investment return is distributed to the beneficiaries.

Management of endowment trust lands is entrusted to the State Board of Land Commissioners consisting of the Governor, Secretary of State, State Controller, Attorney General and Superintendent of Public Instruction. The Idaho Department of Lands is the administrative arm of the Board and carries out the executive directives of the Board to meet the Constitutional trust mandate.

Of Lands

Marianne Besaw, Resource Manager on the St. Joe Supervisory Area, checks tree growth.

Protecting Natural Resources...

In addition to the primary mission of managing endowment trust lands, the Department has been charged by the Idaho Legislature with administering several programs designed to protect the natural resources so vital to the well-being of Idaho citizens. These include:

- **The Idaho Forest Practices Act** which regulates forest management activities on state, private and federal land to ensure continued productivity and protection of soil, air and water quality.
- **The Lake Protection Act** which regulates encroachments over and upon the beds of navigable waters.
- **The Mine Land Reclamation Act** which regulates the reclamation of lands impacted by mining activities.
- **The Placer Mining Act** which regulates mining activities below the high water mark of navigable waters.
- **The Hazard Reduction law** which ensures the mitigation of fire hazard associated with timber harvest.
- **The Idaho Forestry law** which provides for the effective and efficient suppression of wild fires.

The Department also delivers landowner and community assistance programs designed to advance sound resource management. These include, among others, the Forest Stewardship Program, the Community and Urban Forestry Program, the Forest Health Initiative and the National Fire Plan.

Lands, Minerals & Range Division

The Lands, Minerals & Range Division consists of the Real Estate and Surface and Mineral Resources Bureaus. These Bureaus, and the office of the Assistant Director, Lands, Minerals & Range who supervises the Bureaus, are located in the Department's headquarters office in Boise.

The Real Estate Bureau is responsible for coordinating the acquisition and disposal of trust lands through sales and exchanges. It maintains title records to all endowment lands and acquires rights-of-way to access these lands. It also issues easements and temporary permits for roads, pipelines, reservoirs and other surface encumbrances, and processes disclaimers of interest.

The Surface and Mineral Resources Bureau provides statewide policy direction, technical guidance and oversight for the development and extraction of minerals and industrial materials, such as sand, gravel and rock, and the management of agricultural, grazing, recreational and other surface leasing activities on endowment trust lands. It also directs the leasing of commercial properties owned by the trusts and located on the beds of navigable lakes and rivers (public trust lands). The Bureau administers the Surface Mining and Placer Mining Acts which ensure proper reclamation and water quality protection measures on mining operations, and the Lake Protection Act which regulates encroachments, such as docks, on lakes and reservoirs.

Forestry & Fire Division

The Forestry and Fire Division consists of the Forest Management, Forestry Assistance and Fire Management Bureaus. These Bureaus, and the office of the Assistant Director of Forestry and Fire, are located in the Department's Coeur d'Alene Staff office.

The Forest Management Bureau provides statewide policy direction, technical guidance and oversight in the utilization, improvement and protection of the renewable forest resources on endowment trust lands. In addition, the Forest Management Bureau supervises the measurement of forest products harvested as part of the Department's annual timber sale program, as well as the accounting for the receipt of associated payments.

The Forestry Assistance Bureau, staffed by specialists in the fields of forest management, urban forestry, entomology, pathology, fisheries biology, hydrology and geotechnical engineering, provides technical assistance to the Department, other government agencies and private forestland owners. It administers the delivery of programs designed to assist landowners in the responsible management of forest resources, including the Forest Stewardship Program, a cooperative federal-state effort to improve the condition and productivity of Idaho's non-industrial, privately-owned forestlands, and the Urban and Community Forestry program, which provides technical and financial assistance to develop and improve tree cover in Idaho communities. The Bureau also oversees policy administration of the Idaho Forest Practices Act which regulates forest practice operations in Idaho.

The Fire Management Bureau provides policy direction and oversight for the prevention, preparedness and suppression of wildland fires on over six million acres of public and private forest and rangelands across Idaho. To support these functions, the Bureau maintains a large warehouse of fire materials available for dispatch to fires throughout the region, and a fully equipped shop devoted to the fabrication and repair of fire response equipment. The Bureau also administers regulations governing the reduction of fire hazards associated with the harvest of forest products on all lands in the state.

Northern Operations

Delivery of endowment-related and regulatory Department services north of the Clearwater River is provided by seven field offices overseen by the Operations Chief, North, who is located in the Department staff office in Coeur d'Alene. The 75 permanent personnel in these offices, assisted by in excess of 100 seasonal employees, oversee activities on an area with 523,000 acres of endowment trust land. This operational area is the center of the Department timber program with some of the most productive timber land in the inland northwest. The annual timber sale program is 103 million board feet. In addition these offices administer grazing leases covering 90,000 acres, 32 mineral leases, 354 cottage site leases and 54 miscellaneous leases.

Regulatory functions in the northern operations area include seven fire response districts covering nearly 3,000,000 acres of state, private and federal forest land, a heavy load of approximately 3,650 forest practices notifications each year and over 7,500 lake and river encroachment permits.

Southern Operations

Delivery of endowment-related and regulatory Department services south of the Clearwater River is provided by seven field offices overseen by the Operations Chief, South, who is located in the Director's office in Boise. The 70 permanent personnel, assisted by a similar number of seasonal employees, oversee activities on an area with nearly 2,000,000 acres of endowment trust land. The majority of grazing lease activity is located in this operational area with 1,200 grazing leases covering in excess of 1,770,000 acres. In addition, these offices provide an annual timber sale program of 79 million board feet, administer 180 mineral leases, 169 cottage site leases and 186 miscellaneous leases. Large deposits of phosphate ore are located on trust land in the eastern part of this area and significant revenue is generated each year from the mining of this commodity.

Regulatory functions in the southern operations area include forest protection on 1,146,000 acres of state, private and federal land, approximately 550 forest practices notifications each year and nearly 1,000 lake and river encroachment permits.

Support Services

The critical functions that support the overall activities of the Department are housed in the Department headquarters in Boise. These include Fiscal, Human Resources, Management Information Systems and Legal.

The Fiscal Section is supervised by the Financial Officer and is responsible for the accounting functions of the agency. A team of accounting specialists provides oversight and policy direction for purchasing, accounts receivable, accounts payable and internal auditing.

Legal services are provided by the Office of the Attorney General. Two Deputy Attorneys General are housed with the Department and have primary responsibility for providing legal advice, initiating legal action to support Department actions and defending Department actions in court, as necessary. In addition, Deputies housed in the Attorney General's office provide assistance on a case-by-case basis.

Human Resource functions are provided by a team of specialists in the Division of Human Resources (DHR) under a Memorandum of Understanding between the Department and DHR. Payroll and record keeping functions are performed by personnel in the Director's office.

The Management Information Bureau oversees the Information Technology and Geographic Information Systems critical to the success of the Department. Personnel in this Bureau support the Department computer network, software and hardware and maintain land ownership records and databases to assist in planning and implementing management strategies of lands and resources within departmental control. They also provide technical support for the Department website and maintain a website providing access to land records, state facilities, noxious weeds and digital maps.

Board of Scaling Practices

Elton Turcotte, Department Log Scaler

The State Board of Scaling Practices is an independent agency attached to the Department of Lands for administrative purposes. The primary purpose of the Board is to enforce log scaling (measurement) standards prescribed by statute and regulations. In order to accomplish this, the Board tests and licenses scaling practitioners and subjects them to routine, unannounced checks to assure proficiency.

The Scaling Board consists of members who represent industry, logging and private landowner interests appointed by the Governor. By law the Director of the Department of Lands serves as chairman. An Executive Director and staff, headquartered in IDL's Coeur d'Alene staff office, carry out the directives of the Board. Funding comes primarily from an assessment levied on the scale of forest products harvested within the state and from licensing fees.

CPTPA Staff

Timber Protective Associations

The Southern Idaho Timber Protective Association (SITPA), formed in 1904, and the Clearwater-Potlatch Timber Protective Association (CPTPA), which dates from 1905, are associations of land owners who band together to provide wildfire protection under Idaho Code. Together these organizations provide fire prevention, detection and suppression on over 1,370,000 acres. They also administer the Idaho's Hazard Reduction law within their jurisdiction under agreement with the Department.

SITPA, headquartered in McCall, and CPTPA, headquartered in Orofino, are governed by individual Boards and employ staff to carry out Association responsibilities. The Department is represented on both boards. Association budgets are submitted as part of the Department budget, are approved by the State Board of Land Commissioners and are subject to Legislative appropriation.

SITPA and CPTPA are integral members of Idaho's wildfire response team.

Forestry Assistance

Landowner & Community Assistance

Forest Stewardship Program

**13 stewardship workshops with 400-500 participants
One private forest owners' field day with 250 participants**

Forest Health Protection

**30,100 acre tussock moth control project covering 62 different landowners
27 pest detection/evaluation surveys covering 9.5 million acres
33 identification and control training sessions with 1,351 participants
618 responses to requests for forest health protection information**

Community & Urban Forestry

**\$360,000 local matching support generated through Federal & State funding
61 Tree Cities USA, a 500% increase since 1995
Partnerships with the Idaho Department of Transportation and nine Resource
Conservation & Development Councils to extend program outreach
95 community forestry assistance contacts**

Conservation Education

**30 workshops (planting, pruning, tree inventory, chainsaw safety and other topics)
Presentations at county fairs, schools and community celebrations**

Forest Practices Act (FPA)

FPA Administration

**2,500 inspections of forest practice operations
16 logger training sessions (FPA Best Management Practices and fire fighting
safety) with 1,000 participants**

Cumulative Watershed Effects (CWE)

**CWE assessments in 39 sub-watersheds to address forestry issues and assist in
Total Maximum Daily Load (TMDL) development process**

Range & Cropland Leasing

Grazing Program

1,250 grazing leases
1,800,000 acres under grazing lease
264,700 Animal Unit Months (AUMs)

Cropland Program

84 Cropland leases
12,600 acres under cropland lease

Mineral Leasing

Approximately 3,000,000 acres of mineral estate (500,000 acres without surface ownership)
212 mineral leases and numerous permits
Revenue generated from minerals:
60% sand & gravel
30% phosphates
10% building stone, gemstones and miscellaneous mineral commodities

Cottage Sites & Navigable Waters

523 cottage sites (354 at Priest Lake; 167 at Payette Lake; 2 at Southwest)

Approximately 8,500 commercial and non-commercial encroachment permits
400-500 encroachment applications annually

Commercial Property

127,000 square feet of commercial property under management
76% occupancy, a reduction from 78% in 2001

Real Estate Transactions

3 exchanges valued at \$277,235; acquisition of approximately 61 acres, 23 acres deeded
50 easements; 50 temporary permits
13 easements to improve access to endowment land; 9 to protect public recreational access to navigable rivers
12 disclaimers of interest for former state-owned riverbed land

2001 Fire Season Summary

Weather during the 2001 fire season¹ started dry and stayed that way. Snow pack was well below average throughout the state and precipitation received in the spring and early summer was inadequate to significantly lessen fire danger. Dry conditions persisted until November. Fortunately the occurrence of lightning was below average. As a result, the 2001 fire season was average both in terms of numbers of fires and acres burned on lands protected by the Department and Timber Protective Associations. Aggressive initial attack and a well-trained work force resulted in suppression of 393 of 410 fires at ten acres or less, a 96% success rate.

Seven fires grew to more than 100 acres. These fires burned a total of 4,171 acres, 90% of the total. The cost of suppressing these seven fires was \$2,419,185. Total suppression costs for the year was \$3,673,159.

DISTRICT	TOTAL FIRES	ACRES BURNED	FIRE NUMBERS BY CAUSE								
			ARSON	CAMPFIRE	CHILDREN	DEBRIS BURNING	EQUIPMENT	LIGHTNING	MISC	RAILROAD	SMOKING
Cataldo	12	17				3	1	7	1

Maggie Creek	33	121	5	5		4	3	9	6		1
Mica	31	47	1	3	4	12	1	5	4		1
Pend Oreille	52	14	3	5	2	8	4	18	9	2	1
Ponderosa	18	135		2		4		10	2		
Priest Lake	28	445		2			1	23	2		
SITPA	52	11	1	8		9	1	31	2		
Southwest	37	375	1	4			3	26	3		
West St. Joe	21	8		4		2		13	2		

¹ The fire season begins in late spring so does not coincide with the fiscal year. For that reason, figures on this page may not agree with fiscal year figures elsewhere in this report.

Board of Scaling Practices

Enforcement of Log Scaling Regulations

**219 licensed scalers
133 routine, unannounced check scales performed
2 log scaling workshops
694 registered log brands
2 active sales involving disposition of prize logs**

Scaling License Exam Results

**6 scaling license examinations offered
29 exams taken
13 passed
16 failed**

DEFINITIONS

Primary Forest Land: Forest land which is capable of (1) regenerating naturally within 20 years and (2) providing successive crops of commercial timber within a 120 year period. Typically primary forest land is capable of producing 100 board feet of timber per acre (approximately 20 cubic feet per acre) per year.

Secondary Forest Land: Forest land which is not capable of (1) regenerating naturally within 20 years and (2) providing successive crops of commercial timber within a 120 year period. Typically secondary forest land is not capable of producing 100 board feet of timber per acre (approximately 20 cubic feet per acre) per year.

Non-Forested Land: Land that has never supported forest growth or has been permanently developed for other uses such as agriculture, state highways, mining, or industrial purposes.
