BOISE CITY, IDAHO TERRITORY, FRIDAY, APRIL 4, 1890.

NO. 1, 902.

THE GEM OF THE MOUNTAINS.

PROGRESS.

44.

PROSPERITY.

Idaho the Forty-Fourth State in the Union.

In 1890, when it admitted Idaho to the Union, Congress understood that two things above all else would shape the future of the new state:

- 1) *The land and the vast resources on it*
- 2) *The children and how fully their potential was realized*

For that reason, it granted 3.6 million acres to its newest initiate, the revenues from which would fund nine endowment trusts, most dedicated to nurturing the state's public education system.

The vision of our nation's leaders was simple: the miracle of harvest, regeneration and ongoing management — whether it be timber or crops or leasing — would help finance the miracle of the human spirit fulfilled.

Letter from George Bacon, Director

IDAHO DEPARTMENT OF LANDS

The State Board of Land Commissioners and the Department of Lands have been working hard to ensure a steady stream of revenue is provided from our state trust lands for the benefit of Idaho's public schools, colleges and other endowed institutions. We are also working to enhance and sharpen our ability to protect forests from fire, and insects and disease; to manage encroachments on navigable rivers and lakes; to regulate surface mine reclamation and gas and oil operations; and to provide assistance to Idaho land owners. Needless to say, these undertakings have been a major challenge within the depths of the "great recession."

I am happy to report that we not only met that challenge, but are stronger for it. We are smarter, more efficient, and better positioned than ever before. In fact, we are energized by the opportunities that now lie before us.

Over the last hundred years, the State Board of Land Commissioners and the Department of Lands have been *great* stewards of lands held in trust. During that time, traditional land uses included forest management, range management, mining, farming, residential leasing and commercial property development. Those activities helped generate over \$1,200,000,000 in the permanent fund and provided regular income for beneficiary institutions – primarily Idaho's public schools – each and every year. Those regular, annual distributions currently total \$45,786,600.

As a side benefit, Idaho industries have grown with the opportunities we provide. Private enterprise remains a key in helping us manage the land, chiefly through contract services.

We envision the same opportunities and successes over the next hundred years. We will always be stewards of the land, and our traditional uses will continue to provide vitally needed income to state institutions. On top of all that, we are tapping into new possibilities.

As Idaho climbs out the recent recession, we see enormous potential on our horizon. In fact, we envision being able to *double* our revenue, which translates to similar increases in beneficiary distributions, over the next twenty years. Already, new leases for wind farms, oil and gas development, and manufacturing plants have been signed. As we have always done, we are managing trust properties for their highest and best use, consistent with prudent business practices. And, we are strategically disposing and acquiring other lands wherever they provide increasing income and diversity for the trusts.

I am proud to present this report on the stewardship, assistance, protection, and regulatory duties we are providing. Today marks the beginning of our next hundred years!

Sincerely,

The Idaho State Board of LAND COMMISSIONERS

The Idaho State Board of Land Commissioners consists of Idaho's governor, secretary of state, attorney general, superintendent of public instruction, and state controller. They are the stewards of the nearly 2.5 million acres of Idaho's endowment lands and the tens of millions of dollars in revenues generated for the state's designated beneficiaries.

Primary among the fund's beneficiaries are Idaho's elementary and secondary public schools, which receive 95 percent of endowment's annual revenues. Other constitutionally designated beneficiaries are:

- The Agricultural College Fund (at the University of Idaho)
- The Charitable Institutions Fund (at Idaho State University)
- The Industrial Training School
- State Hospital North
- Idaho State Veterans Homes
- The School for the Deaf and Blind
- The Penitentiary Fund
- The School of Science Fund (at the University of Idaho)
- The State Hospital South Fund
- The University Fund (at the University of Idaho)
- The Normal School Fund
(Idaho State University Department of Education and Lewis-Clark State College)
- The Capitol Commission

Because of the board's responsibility to protect the lands of the state, it also serves as the host agency for the Idaho Board of Scaling Practices, the Clearwater-Potlatch Timber Protective Association, and the Southern Idaho Timber Protective Association.

A variety of regulatory programs protect Idaho's water quality and other public values.

C.L. "Butch" Otter
Governor of Idaho

Ben Yursa
Secretary of State

Lawrence Wasden
Attorney General

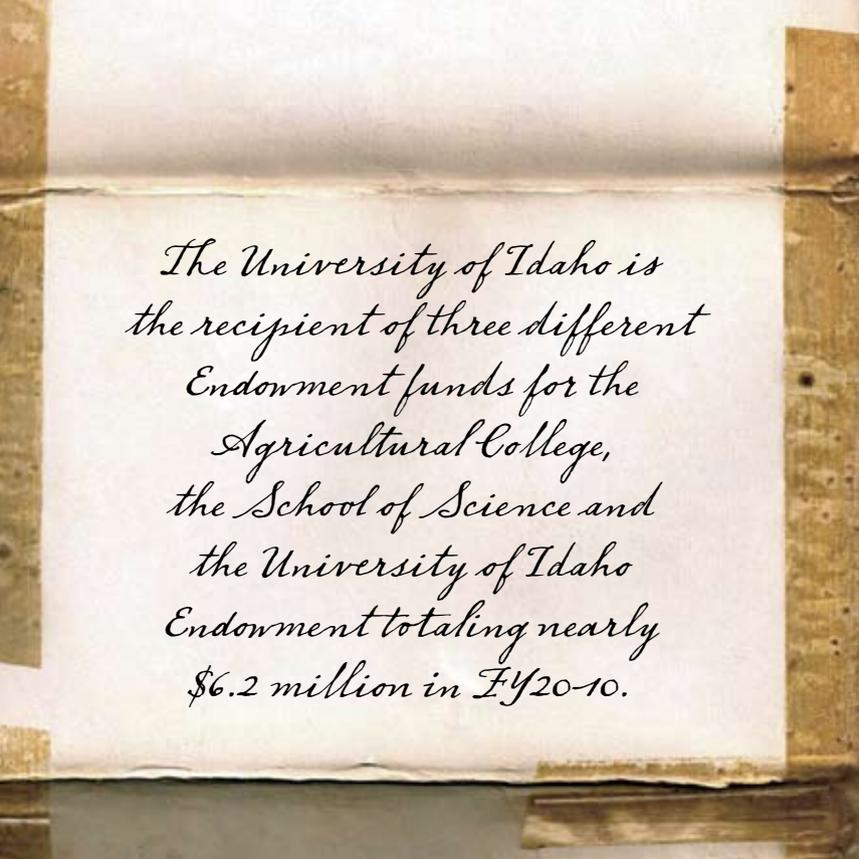

Donna Jones
State Controller

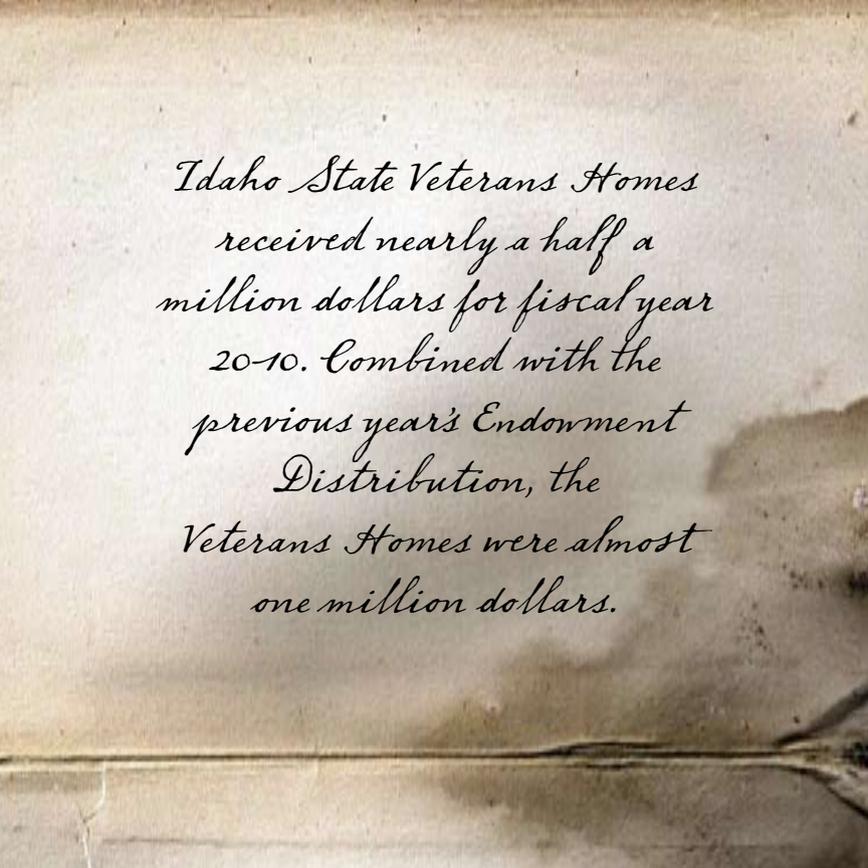

Tom Luna
Superintendent of Public Instruction

George Bacon
Secretary of the Board

The University of Idaho is the recipient of three different Endowment funds for the Agricultural College, the School of Science and the University of Idaho Endowment totaling nearly \$6.2 million in FY20-10.

Idaho State Veterans Homes received nearly a half a million dollars for fiscal year 20-10. Combined with the previous year's Endowment Distribution, the Veterans Homes were almost one million dollars.

The Land Where *Miracles Grow*

As it was deliberating the Idaho Admissions Act in 1889, the United States Congress displayed uncommon wisdom by granting what would become the Union's 43rd member 3,600,000 acres of land for the sole purpose of funding specified beneficiaries, primarily the state's public schools. This mandate was later chiseled into the granite of the Idaho Constitution through Article IX, Section 8, which mandates that the lands will be managed "...in such manner as will secure the maximum long-term financial return to the institution to which [it is] granted." The prescribed income is generated in a number of ways: the sale of land; the sale of timber; leases for grazing, farming, conservation, commercial buildings, recreational homesites, and mining; and earnings from invested funds. The Endowment Fund Investment Board is charged with managing the invested revenues from the endowment lands. Until 1968, it was limited to a "buy-and-hold" investment strategy as dictated by the original legislation that created the fund. Subsequent constitutional amendments approved in 1968 and 1998, enabled the board to take advantage of all the modern investment tools available to it. As a result, the fund's assets rose dramatically — from \$77 million when the board was created to over \$1 billion today — with a corresponding increase in the financial resources available to the beneficiaries.

On December 20, 2007, the State Board of Land Commissioners approved a new asset management plan based on three prudent principles:

- Maximize the long-term financial return at a prudent level of risk
 - Protect future generations' purchasing power
 - Provide a relatively stable and predictable payout

Preserving our *Assets*

As noted, much of the Land Board's annual income is derived from the sale of the timber that grows on the endowment lands. While trees are unaffected by fluctuations in the stock market; insects, disease, and fire can have catastrophic effects on our ability to generate revenues. Thus, in our case, a prudent investment strategy includes a team of expert foresters and fire fighting professionals. Headquartered in Coeur d'Alene, the Forestry and Fire Division consists of three independent bureaus: Forest Management, Forestry Assistance, and Fire Management.

The Forest Management Bureau provides overall statewide policy direction, technical guidance and general oversight of the management of the endowment trust's lands. It is also responsible for monitoring the timber harvest and the accounting for the associated receivables. The Forestry Assistance Bureau provides technical assistance to the other Department of Lands programs and state and federal officials. It also advises and assists private landowners in the responsible management of forest resources and enforces the policies set forth by the Idaho Forest Practices Act, which regulates commercial forest operations within Idaho. It is staffed by specialists in forest management, entomology, pathology, fisheries biology, hydrology, and geotechnical engineering.

The Fire Management Bureau is probably the most visible of the department's divisions. On a day-to-day basis it establishes and implements policies to prevent, prepare for, and fight wildland fires over six million acres of Idaho's public and private forest and rangelands. These responsibilities include regulating the elimination of fire hazards caused by timber harvesting on state and private lands within Idaho.

David Groeschl - Assistant Director - Forestry and Fire

Bob Helmer - Chief - Forest Management

Craig Foss - Chief - Forestry Assistance

Brian Shiplett - Chief - Fire Management

National Fire Plan in Idaho

PROGRESS in 2010

In 2010, the 10th year of the National Fire Plan in Idaho, great strides have been made in preparing for wildland fire in Idaho's communities by aligning agencies, treating hazardous fuels, equipping fire districts, restoring landscapes, and educating property owners and citizens.

There is continuous effort among fire districts and agencies to strengthen their coordination and communication. The IDL Volunteer Fire Assistance grant program funded 63 fire departments and districts in 2010, awarding \$194,843 for firefighting and communication equipment, training, and other resources.

All 44 counties have active County

Wildfire Protection Plans, and most have active county working groups that are designing and implementing projects on the ground. The State is supporting development of the West Wide Wildfire Risk Assessment that will be useful to both state and county working groups in understanding risk and prioritizing projects. Since 2001, over two million acres of hazardous fuels reduction has been completed across ownerships in Idaho. About 55 percent of the treatment acres were within the wildland urban interface (WUI). In 2010, 3,979 acres were treated on private land.

Outstanding active wildfire education and protection programs exist throughout Idaho. Local fire cooperatives are strong, and many counties host workshops and events and have developed websites and prevention materials. This work will now be brought together and enhanced with the new statewide Idaho Firewise program (visit www.idahofirewise.org).

The Idaho wildland fire community has come together through state wildland fire conferences, state and county working groups, interagency after-action reviews, mock fire exercises, and extensive networking and dialogue. Idaho now has 16 nationally recognized Firewise Communities and dozens of other groups working together informally to protect their communities.

Living off **THE LAND**

The Lands, Minerals and Range Division includes the Surface and Mineral Resources Bureau which manages six leasing programs, three regulatory programs and one assistance program.

Cottage Site Lease Program

More than 500 cottage site leases located at Priest Lake and Payette Lake are managed by the Department. Lessees are allowed to build private residences on some of the most beautiful waterfront and secondary lake properties in the state of Idaho.

Commercial Lease Program

The Commercial Lease Program involves a broad range of leasing scenarios including energy resources (e.g. wind energy and geothermal); communication sites; retail/office; recreation, industrial facilities; and military facilities. Energy resource leases, especially alternative energy facility leases, and retail/office leases are expected growth areas for the Department.

Mineral Lease Program

The Mineral Lease program manages almost 200 leases across the state which cover more than 40,000 acres. Minerals extracted from state endowment trust lands include phosphate, sand and gravel, decorative stone, garnets, clay, and cinders.

Grazing Lease Program

The Department manages more than 1,200 grazing leases that cover almost 300,000 acres of timberland and 1.5 million acres of rangeland located primarily across the southern two-thirds of Idaho. These leases contribute approximately 260,000 AUMs of forage to livestock operations each year.

Farming Lease Program

Most of the original farming land owned by the endowments was sold during the early portion of the 1900's. What remains is a small portfolio of farming leases that total approximately 20,000 acres. Crops currently grown on state endowment trust lands include sugar beets, corn, onions, potatoes, barley, hops, dry beans, and wheat.

Lands, Minerals And Range Administration

Bob Brammer - Assistant Director

Mike Murphy - Chief Bureau of Surface
and Mineral Resources

Conservation Lease Program

Until the adoption of the State Board of Land Commissioners Asset Management in 2007, the “conservation” asset type was not formally recognized by the Department. Since that time and based on recent administrative rule changes, the Department does accept applications for conservation use and continues to manage a small portfolio of conservation leases.

Navigable Waters Regulatory Program

The Navigable Waters program regulates encroachments and activities on, in, or above the navigable lakes in the State of Idaho. Additionally, this program manages the beds and banks lying below the ordinary high water mark of the state’s navigable rivers and streams. In total these lands are managed for the public’s benefit as public trust lands.

Mining Regulatory Program

The Mining Regulatory program regulates surface mining and dredge/placer mining on all state, private, and federal lands in the State of Idaho. Mining plans and reclamation bonds are required prior to the start of mining. Plans are reviewed and approved in coordination with other state and federal agencies.

Oil and Gas Regulatory Program

The State Board of Land Commissioners acts as the Oil and Gas Commission which regulates the exploration, drilling and production of oil and gas resources to ensure the conservation of oil and gas and the protection of surface and groundwater. Although oil and gas drilling permits have been issued by the Department, no commercial oil and gas wells are currently in production on state endowment trust lands or private lands in the State of Idaho.

Abandoned Mine Lands Program

The Abandoned Mine Lands Program provides financial and technical assistance to land owners across the State of Idaho with abandoned mine issues. Public safety and environmental protection are the focus of this program which is funded by a portion of the Mine License Tax.

Idaho State
University
Receives
\$1,330,000

During the 2010 Fiscal Year, the land board increased the Beneficiary distribution to Idaho State University by over \$60,000 to \$1.3 million from funds generated by Idaho’s endowment assets.

Board of Scaling PRACTICES

The Idaho Board of Scaling Practices enforces log scaling (measurement) standards prescribed by statute and regulation, to ensure professional quality log scaling for the benefit of Idaho timber interests. The Board tests and licenses log scaling practitioners and subjects them to routine, unannounced check scales to assure proficiency. The Board also administers log brand registrations and the disposition of prize (abandoned) logs.

Appointed by the governor, Board members represent industry, logging, and private landowner interests.

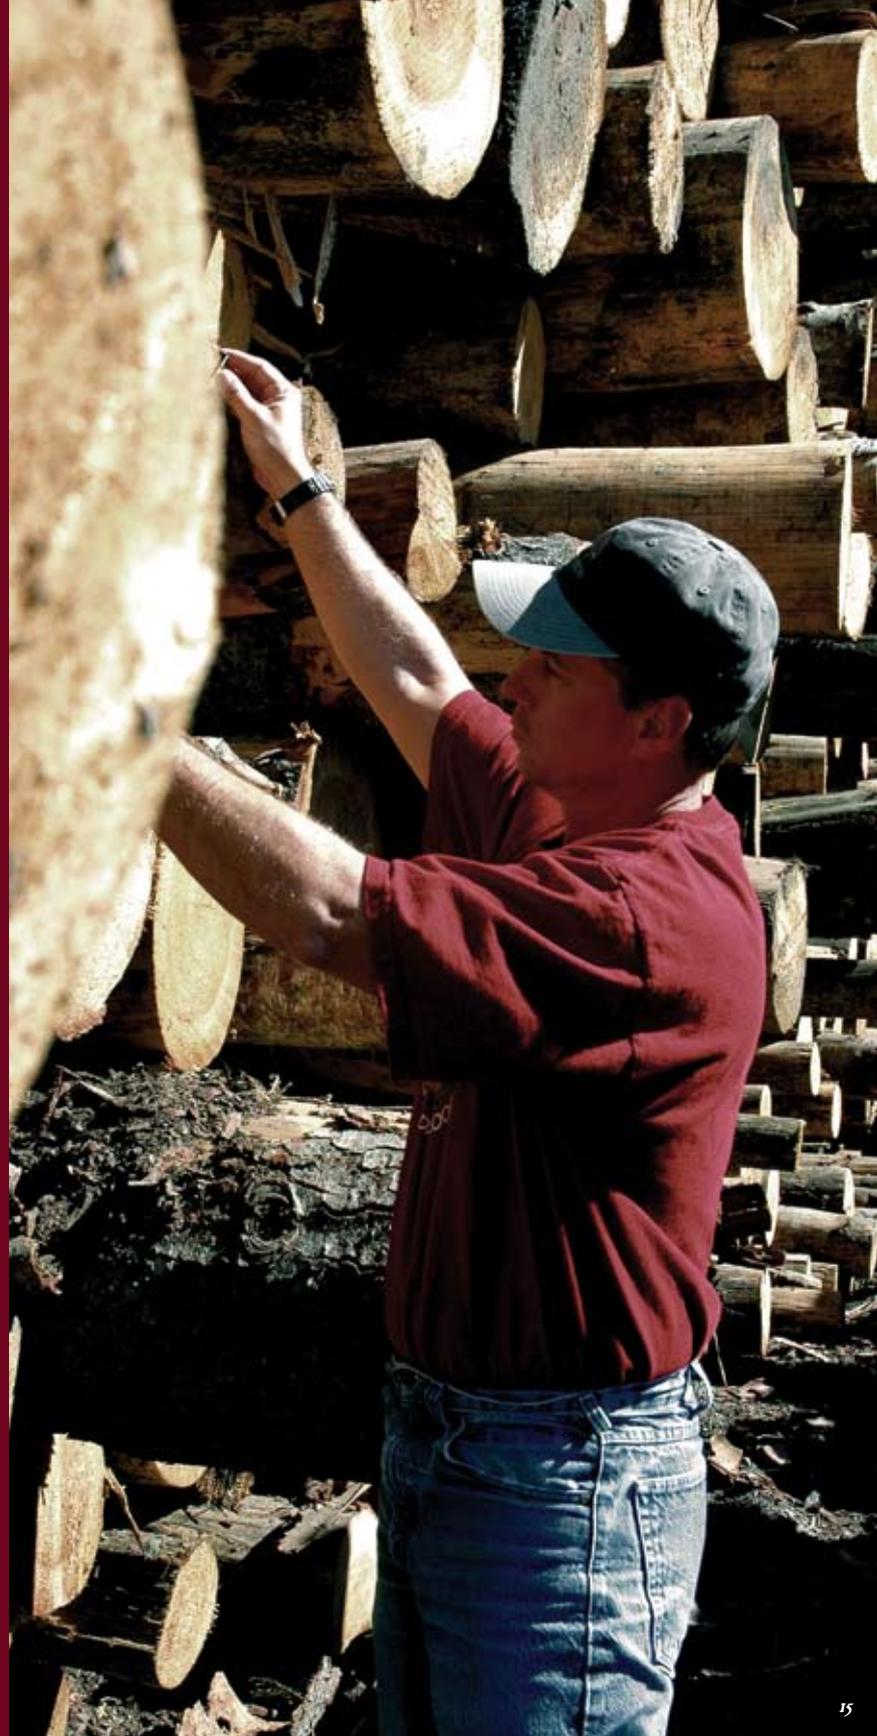

Current board members are:

- George B. Bacon, Chairman
- Jack Buell, Vice Chairman
- H. Larry Stewart, Secretary
- Robert E. Boeh, Gerry Ikola and Lynn House

An executive director and check scaler, headquartered in the Idaho Department of Lands Coeur d'Alene office, carry out the Board's directives. Funding for the board is derived from assessment fees levied on the scale of forest products harvested within the state and from licensing and registration fees.

Idaho Department of Lands

SUPPORT SERVICES

Invisible to most but vital to the smooth operation of the entire department — including the Land Board — the dedicated people in the support services division of the Idaho Department of Lands perform legal, fiscal management, information systems, and personnel functions from their offices in the department's headquarters in Boise and Coeur d'Alene.

Legal Oversight

Legal counsel is provided to the department by the Idaho attorney general. Two deputy attorneys general are assigned specifically to the Idaho Department of Lands and have their offices in the IDL's headquarters.

They provide legal advice to the department, initiate legal action on the department's behalf, and, when necessary, defend the department in court. Supplementary assistance may be provided by additional deputies in the attorney general's office if case loads, other duties, or the specific nature of the action require it.

Fiscal Management

Under the supervision of the financial officer, the Fiscal Section provides oversight and policy direction for all accounting functions within the department, including purchasing, accounts payable and receivable, and internal auditing.

Human Resources

The department's human resource manager works closely with the state's division of human resources to deliver all personnel responsibilities, including payroll, recruiting, and record keeping.

Management Information Systems

Information system needs critical to the department's operation are the responsibility of the Information Technology and Geographic Information System sections.

The Information Technology section manages the department's entire network infrastructure, including hardware, software, remote backup and storage, and help desk duties.

The Geographic Information System (GIS) section maintains the property ownership databases and records that are vital to the department as it formulates management strategies for the lands under its control.

It also administers the department's GIS website which provides access to land records, published maps, aerial photography sources and digital maps of the entire state.

Support Services Administration

Forestry

ASSISTANCE

Forest Stewardship Program (includes Forest Legacy)

- 1,488 forest landowners received technical assistance
- 521 forest landowner participants at 24 stewardship educational workshops, focusing on 12 different topics including fire-prevention landscaping, conservation easements, and family forestland succession planning
- 69 new or revised Landowner Forest Stewardship Plans (LFSPs)
- 143 Landowner Forest Stewardship Plans re-inspected
- Partnered with Natural Resources Conservation Service (NRCS) to assist 55 landowners with EQIP management plans and practices
- Completed documentation for two 2012 Forest Legacy Program (FLP) project applications, covering 1,257 acres. Closing of an FLP project, covering over 3,700 acres adjacent to McArthur Lake, is scheduled for December 1, 2010
- Stewardship grant awards were used to educate over 200 forest landowners at the 2010 WA-ID Forest Owners Field Day, and to treat 50 acres of sawfly-infested trees in the Hayden Area Regional Sewer Board wastewater-treatment poplar stand
- Partnered with over 170 forestry professionals from multiple entities to fund and facilitate the Idaho State Forestry Contest, providing field education and forestry skills competition to over 400 elementary, middle and high-school students
- Provided funding to UI Extension Forestry to continue the Master Forest Steward volunteer program which successfully trained 19 participants in 2009

Forest Health Protection

- Three pest detection surveys covering 2,442,422 acres (Aerial Detection Survey: 1,468,243 acres, Gypsy Moth survey: 817,547, Douglas-fir Tussock Moth survey: 156,632)
- 71 insect and disease identification and management training sessions, with 2,178 participants
- 389 responses to requests for forest health information
- Provided stimulus and other federal grant funds to the Shoshone County Forest Health Collaborative, which will improve forest health and reduce hazardous fuels within the Silver Valley's Wildland Urban Interface. Assistance was provided to over 90 landowners; 568 acres were treated

- Assisted the USDA Forest Service Region 4 with a 2,000 acre Douglas-fir beetle suppression project at the Bald Mountain ski area in the Sun Valley-Ketchum area. IDL conducted an informational public meeting summarizing the project for interested landowners. IDL also administered cost share to seven private landowners and one homeowner's association adjacent to the project area. Approximately 200 private forested acres were protected from Douglas-fir beetle

Community & Urban Forestry (includes conservation education)

- Initiated a canopy analysis project in the Treasure Valley to determine the contribution of tree canopy to air quality, energy conservation and storm-water mitigation. Modeling potential future benefits of increased canopy to help meet Federal requirements for ozone is a special emphasis of the project. Partners include Idaho DEQ, Idaho Power, storm-water managers, county and city planners, transportation districts and more
- Granted \$1 million in stimulus funds to eleven cities in Ada, Bonner, Canyon and Kootenai Counties. More than 4,500 park and street trees were treated to mitigate critical urban forest safety issues and improve the health, value, function and longevity of this public asset
- 71 Tree City USA designations with 14 Tree Cities also receiving a Tree City USA Growth Award for significant improvement to their tree management programs
- Partnered with the Idaho Transportation Department on a Transportation Enhancement project, providing \$172,000 in grants (leveraging an additional \$173,000 in match) to ten cities for landscaping to reduce storm-water runoff, encourage non-motorized transportation, for education and to enhance downtown business districts

State Assessment of Forest Resources (SAFR)

The Idaho Department of Lands - in partnership with state and federal agencies, organizations, tribes, industry, conservation, and advisory groups - completed a State Assessment of Forest Resources and Statewide Forest Resource Strategy for Idaho. The assessment describes geospatially the key issues that most threaten forests in the state, and for which forests provide greatest benefit, from downtowns to tree line and across all ownerships. The Resource Strategy depicts priority landscape areas in which to focus work and identifies actions and opportunities for collaborative projects that address the key issues, leading to greater positive change on a landscape scale. For more information, go to: <http://www.idl.idaho.gov/bureau/ForestAssist/safr/safr-final.html>.

Forest Practices Act (FPA)

FPA Administration

- Conducted 1,410 forest-practices inspections, on 1,008 different harvesting operations, on Idaho's private forestlands and found a 97% rate of compliance. For the complete report summarizing 2009 inspection activities is posted at: <http://www.idl.idaho.gov/bureau/ForestAssist/fpa/20100310/2009-Forest-Practices-Year-tEnd-Report.pdf>
- Partnered with Montana and Washington natural resource agencies in presenting Forest Practices Update sessions at the Intermountain Logging Conference. Approximately 60 loggers and forestry professionals, from three states, attended these sessions
- Led an internal audit, looking at 19 Class II Stream Protection Zone segments across the state, focusing on leave-tree-retention rule compliance

Cumulative Watershed Effects (CWE)

Twenty watersheds are being assessed in the Clearwater and Lower Kootenai River Basins. Watersheds assessed in 2010 have been previously assessed using the CWE process. Results of the 2010 CWE assessments will be used to develop implementation plans designed to alleviate adverse conditions, and monitor progress toward achieving CWE objectives.

Interdisciplinary Team Field Visits

The Interdisciplinary (ID) Team members conducted 135 field visits on individual projects throughout the IDL Supervisory Areas. Twenty-four follow-up reports were provided including recommendations for stream crossing installations, bridge/road installation and repair, stream classification, landslide repair, rock pit development, road rocking, interpretation of various FPA rules, project implementation oversight, stream channel restoration, etc.

American Recovery & Reinvestment Act (ARRA) Projects

The IDL was awarded \$5,149,000 in federal stimulus project money to pass through to Idaho counties and cities.

The ARRA funds were spent on hazardous fuel treatments, forest thinning, and urban forest health projects (i.e. - tree pruning and removal).

Three projects totaling \$2,849,000 were awarded through the Bureau of Forestry Assistance:

\$1,817,000

Shoshone County
Hazardous Fuel
Reduction & Forest
Thinning Project

\$516,000

Ada/Canyon County
Urban Forest
Health Project

\$516,000

Kootenai/Bonner
County Urban
Forest Health Project

Fire Season IN REVIEW

The 2010 fire season was below the twenty-eight-year average in terms of fire occurrence and acres burned. Firefighters responded to 183 fires (48 percent of average) on lands protected by the Idaho Department of Lands (IDL), Clearwater-Potlatch Timber Protective Association (CPTPA), and Southern Idaho Timber Protective Association (SITPA). These fires burned 3,465 acres, which is 33 percent of the average acreage burned.

Favorable weather and the quick response by dedicated teams of firefighters kept 94 percent of these fires to less than 10 acres.

Human activity ignited 97 fires (53 percent of the year's total) that burned 1,736 acres. Human-caused fires accounted for 50 percent of the burned area. The miscellaneous category accounted for the most human-caused fires and burned the largest area. Debris burning was the most expensive human-caused category.

Lightning started 86 fires (47 percent of the year's total) and burned 1,729 acres, or 50 percent of the total area.

The average fire size was 18.9 acres, which is 70 percent of the twenty-eight-year average. The median fire size was 0.1 acres, which is the usual. The average fire cost was \$22,463, and the cost per acre was \$1,186.
