Hi Keith,

Thanks for the additional comments submitted in your email. I have added a copy of your email to the folder containing the comments we have received regarding the APD submitted for the proposed Federal 20-3 well.

Subject: CPC Mineral LLC Fereral 20-3

James;

I would like to make an additional comment on this application.

It has come to my attention that CPC Mineral LLC has no general liability insurance nor any pollution liability insurance. This coupled with only requiring a \$50,000 bond is very troubling.

I feel this is extremely irresponsible. It puts neighboring property owners, lease land owners, the people of Idaho, and Idaho Department of Lands at tremendous risk. If something were to occur, the \$50,000 would be gone in a heart beat. CPC Minerals has no disclosed assets. This leaves the burden on the citizens of and the State of Idaho.

With the history of CPC Minerals and the nature of oil/gas exploration the chance of some accident is quite high.

Again, I do not feel a permit should be issued at all, but especially with out proper safe guards to protect us.

Thanks;
M.Keith Gardner, adjacent land owner
