**Date:** Saturday, October 22, 2016 04:36:07 PM

---

I ask that the Idaho Department of Lands improve the proposed regulations to go further to respond to citizen concerns that have been raised in this rule making process.

Transparency is very important in this business. The public has a right to see the records. Private property should be protected by setbacks from a wellhead of more than 300 feet, and local governments should be able to set adequate setback rules. Surface bonds should be at least \$10,000.

Thank you for considering the comments from the public that these rules and regulations need to be more protective of Idahoans' health, safety, property and environment.

Sincerely,

--
