Subject: Wolf Lodge Bay

We wish to go on record as adamantly opposed to placing a commercial business in the shallows of Wolf Lodge Bay. In addition to being an eyesore on the entrance to a scenic byway, there are numerous safety issues with the sites access to highway 97. The applicant has shown himself to be less than honest about how he intends to use the site. Once he is given permission to conduct that kind of business on the proposed site, anything goes. There will be oil spills, soil and lake pollution. Inspection of the applicants existing business sites will confirm the danger this type of business poses to the environment. The equipment used by the business is old and rusty and is not well maintained. Unfortunately, there are few resources to enforce any environmental laws or agreements that are not honored. We actually live on the east side of Lake CDA, and we have seen NIM operations. While NIM provides a necessary service, Wolf Lodge Bay, specifically the tiny piece of land proposed as the site of operations, is not an appropriate place to conduct the activities of this type of business.

Sincerely,

Gil and Jo Moncrief
