Referencing Case#PH-2020-PUB-22-002 North Idaho Maritime – John Condon, Applicant – Encroachment Permit Application, No. ERL-95-S-1378B

Because Wolf Lodge Bay is not only a part of our public ownership, and it is a beautiful and important wildlife refuge and wetland, we fear that any sort of building operation such as is seeking this encroachment should be denied. Wolf Lodge Bay is one of the few natural areas that you can see as you drive by and it would be a travesty to take that from the public and the neighbors across the highway. In addition, the traffic on the already narrow roadway and overpass would increase, making it even more difficult to navigate. In a time when our lake is at a critical oxygen deficit, and over-development is rampant, we do not need to add yet another eyesore and polluter. Mr. & Mrs. Roland Williams
