Subject: Wolf Lodge Bay Development

Writing as I'm concerned with the proposed development.

The development WILL impact Existing and Future wildlife Habitat. There's a large population of Eagles which frequent this area and will be negatively impacted by the development and the proposed dock in that area.

Eagles are transitory creatures and are dependent upon this area for their food and survival. Other Wildlife that frequent this area also utilize it for Food and their Habitat.

I urge you to reconsider and at the VERY Least require Mitigation for those impacted Species based upon Expertise from Local Wildlife Experts. I'm positive that mitigated measure for the development can increase the viability of the development at the same time relieve impact and even increase the suitability of this area for wildlife.

Thank you for allowing me to comment on this important decision.
If I can be of any help please don't hesitate to contact me via Email at dalear6@aol.com.

Sincerely
Dale Arnold
