Comment:

As a local resident for nearly my entire life in Kootenai County and a contractor for here for 20 years. We do a considerable amount of Shoreline and Remediation work on waterways and have a great loyalty to the area and want reasonable preservation of it but also understand growth. As stated We do a great deal of work along the shoreline of Lake Coeur d'Alene and I have worked with North Idaho maritime Often. We would be in favor and support the proposed activities at Wolf Lodge considering NIMs quality and the attention that they pay on a daily basis regards to the aquatic environment. Like it or not, with the growth that we are Currently experiencing, this is a service that is needed and in demand. Especially When considering that specific portion of land, it seems like a logical and responsible use of the real estate to serve the needs of the tax paying residents of a City that is in a great way driven by the lake.
