# IDAHO DEPARTMENT OF LANDS FY14 TIMBER SALE PLAN

July 1, 2013 – June 30, 2014

## Types of Sales

### Timber Sales

Timber sales contain an estimated volume of at least 1,000 MBF and exceed the net appraised stumpage value for salvage sales established by the state board of land commissioners. Timber sales are designed to produce maximum stumpage returns to the endowment funds consistent with prudent long-term management practices.

Timber sales are advertised for four weeks in a newspaper in the county where the sale is located, and are sold at public auction.

### Salvage Sales

Salvage sales do not exceed the net appraised stumpage value and volume established by the State Board of Land Commissioners and are intended to be used in the harvesting of timber which, in the opinion of the director, is of insufficient quality and/or quantity to support a timber sale. The contract requirements for salvage sales are the same as for timber sales.

Salvage sales are advertised for a minimum of one week in a newspaper in the county where the sale is located, and are sold at public auction.

### Direct Sales

Direct Sale net appraised stumpage value does not exceed the maximum value established by the State Board of Land Commissioners. This type of sale is to be used to harvest isolated or by-passed parcels of timber of insufficient value and volume to justify a salvage sale. The direct sale is not used where two or more potential purchasers may be interested in bidding on the forest products offered for sale.

The direct sale of forest product stumpage is made without advertisement as authorized by the Director.

# IDAHO DEPARTMENT OF LANDS FY14 TIMBER SALE PLAN

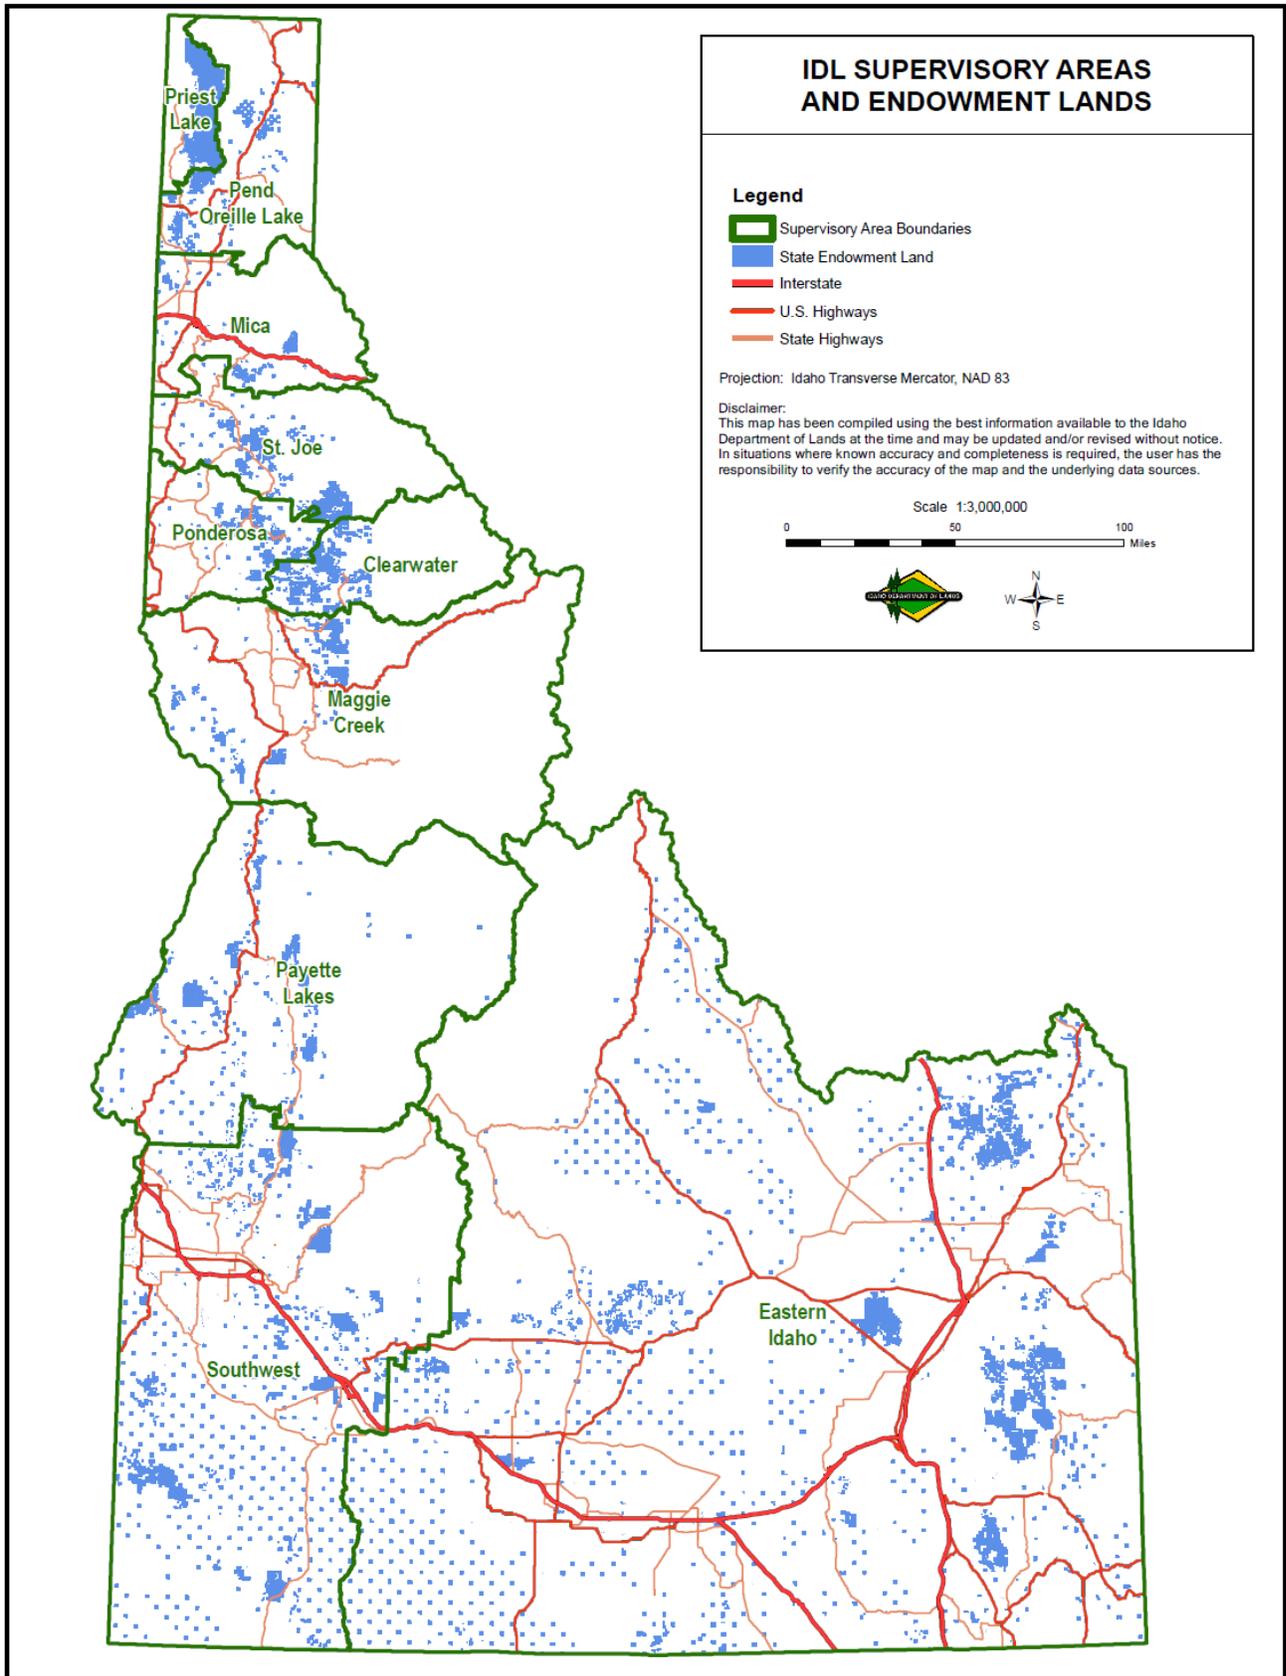

July 1, 2013 – June 30, 2014

## Priest Lake Supervisory Area

SALE NO.	SALE NAME	SUBDIVISION	SEC	T & R	APPROXIMATE	
					ACREAGE	VOLUME
1	<b>Trap Back</b>	Pts. SWNW, Pts. SW	4	63N/4W	135	1,900 MBF
		Pts. SENE, Pts. E2SE	5	63N/4W		
		Pts. NE, Pts. N2SE	8	63N/4W		
		Pts. NWNW	9	63N/4W		

Estimated Auction: Summer 2013

This sale is located within the Trapper Creek and East Fork of Trapper Creek drainages approximately 25 air miles north of Coolin, Idaho in Bonner County. This sale will be harvested involving three small to medium size clearcuts and some overstory removal and shelterwood harvest methods. Ground based yarding with single-grip harvester and forwarder will be required on portions of the sale. Developments will include approximately 1.2 miles of spur road reconstruction. All roads within the sale will be closed with earthen berms or locked gates after conclusion of sale activities. East Fork of Trapper Creek, a Class I stream, is located more than 600 feet from the sale area. The upper reaches of Trapper Creek and several Class II perennial and intermittent streams are within or adjacent to the sale area.

2	<b>Lucky Again</b>	Pts. SESW, Pts. SWSE	36	63N/4W	80	1,200 MBF

		Pts. NW, Pts. N2SW	24	33N/5E		

Estimated Auction: Summer 2013

This sale is located approximately 12 air miles northeast of Kooskia, Idaho in the Suttler Creek and Maggie Creek drainages. This sale will utilize clearcut and shelterwood silvicultural prescriptions. Both cable yarding and tractor skidding will be required. Approximately 1.47 miles of spur road construction, 2.46 miles of spur road opening, and 5.44 miles of main road opening is proposed. A bridge will be installed across Suttler Creek to replace a failing culvert and provide fish passage. Approximately 10,000 cubic yards of 1" minus rock will be crushed with 3,060 cubic yards being applied at designated locations. The remaining 6,940 cubic yards will be stock piled for future use. Approximately 3,640 cubic yards of pit run rock will be applied at designated locations with the remaining 450 yards to be stock piled and used if needed. The sale is bordered by a Class II tributary of Maggie Creek to the north. There are Class I, Class IIa and Class II segments of Suttler Creek that border the sale to the south. Class II intermittent and perennial streams are present within the sale area.
