IDAHO DEPARTMENT OF LANDS FY15 TIMBER SALE PLAN

July 1, 2014 – June 30, 2015

Types of Sales

Timber Sales

Timber sales contain an estimated volume of at least 1,000 MBF and exceed the net appraised stumpage value for salvage sales established by the state board of land commissioners. Timber sales are designed to produce maximum stumpage returns to the endowment funds consistent with prudent long-term management practices.

Timber sales are advertised for four weeks in a newspaper in the county where the sale is located, and are sold at public auction.

Salvage Sales

Salvage sales do not exceed the net appraised stumpage value and volume established by the State Board of Land Commissioners and are intended to be used in the harvesting of timber which, in the opinion of the director, is of insufficient quality and/or quantity to support a timber sale. The contract requirements for salvage sales are the same as for timber sales.

Salvage sales are advertised for a minimum of one week in a newspaper in the county where the sale is located, and are sold at public auction.

Direct Sales

Direct Sale net appraised stumpage value does not exceed the maximum value established by the State Board of Land Commissioners. This type of sale is to be used to harvest isolated or by-passed parcels of timber of insufficient value and volume to justify a salvage sale. The direct sale is not used where two or more potential purchasers may be interested in bidding on the forest products offered for sale.

The direct sale of forest product stumpage is made without advertisement as authorized by the Director.
