Hey Amidy,

Yes, we would like to extend the time frame for this application.

Thanks, Colton

Hi,

Mike and I were wondering if you were wanting to extended your time frame for this application or continue with the process. Once we receive payment we typically start process but your letter came the next day.

So if you could just clarify if would you like to extend the time frame or start the process?

Also, just a quick glance at the application.... This is an abnormal one and I am not 100% sure what else may be asked for but I do know the normal things will be needed. I have highlighted the ones that will be needed with this application.

IDAPA 20.03.04 07. Forms, Filing. Applications and plans shall be filed on forms provided by the Department together with filing fees and costs of publication when required by these rules. Costs of preparation of the application, including all necessary maps and drawings, shall be paid by the applicant.

a. Plans shall include the following information at a scale sufficient to show the information requested:

i. Lakebed profile in relationship to the proposed encroachment. The lakebed profile shall show the summer and winter water levels. Water depth and profile of this location.

ii. Copy of most recent survey or county plat showing the full extent of the applicant's lot and the adjacent littoral lots.

iii. Proof of current ownership or control of littoral property or littoral rights. A statement that NIM / John Condon has littoral rights

iv. A general vicinity map.

v. Scaled air photos or maps showing the lengths of adjacent docks as an indication of the line of navigability, distances to adjacent encroachments, and the location and orientation of the proposed encroachment in the lake.

vi. Total square footage of proposed docks and other structures, excluding pilings, that cover the lake surface.

vii. Names and current mailing addresses of adjacent littoral landowners.

b. Applications must be submitted or approved by the littoral owner or, if the encroachment will lie over or upon private lands between the natural or ordinary high water mark and the artificial high water mark, the application must be submitted or approved by the owner of such lands. When the littoral owner is not the applicant, the application shall bear the owner's signature as approving the encroachment prior to filing.

Like I said, I am sure there may be more things as we go through this that is needed to make this complete. However, we really need to know if you want to start the process or hold off like the letter stated?

Have a good weekend and let me know if you have questions.

Thanks,

Amidy Fuson
