16. DETAILED DESCRIPTION OF EACH ACTIVITY WITHIN OVERALL PROJECT. Specifically indicate portions that take place within waters of the United States, including wetlands: Include dimensions; equipment, construction, methods; erosion, sediment and turbidity controls; hydrological changes: general stream/surface water flows, estimated winter/summer flows; borrow sources, disposal locations etc.:

Winter Storage:

Bring floating encroachments to Cougar bay with 1-2 man crew and tugboat. They will be tied together and secured to existing pile with rope. These will be stored from October through May.

Storage are will be ~2-3 Acres as needed. The max area would be ~1000' long and ~300' wide.

Winter storage area would likely see a tug bringing in floating encroachments most evenings for about 2/3 weeks in October. Likewise, It would likely see a tug leaving the area most mornings, returning floating encroachments, for about a 2/3 week period in May.

Work Area:

Inside of the "Winter Storage Area" will be an area ~1-2 Acres in size designated as a "work area". This area will include the intermittent storage of miscellaneous docks for repair, resale, and disposal all year-round. Along with repairs this area would be suitable for assembly of modular dock sections that are built off-site. Typically a 1-2 man crew with a boat and possibly a barge would be in this area as needed.

The "work area" would see 1-2 boats w/ 2 man crew intermittently as needed through the year.

No dredging or fill material will be used at this site.

17. DESCRIBE ALTERNATIVES CONSIDERED to AVOID or MEASURES TAKEN to MINIMIZE and/ or COMPENSATE for IMPACTS to WATERS of the UNITED STATES, INCLUDING WETLANDS: See Instruction Guide for specific details.

- Deadheads will be avoided in transport.
- Employees will practice responsible measures while building, repairing, and demolition when needed.
- Boats will be reasonably maintained to prevent any leaks of fluids.
- All necessary infrastructure is already in place so there are no additional impacts in that regard
- Floating encroachments secured with multiple lines and additional log boom if necessary
- Floating encroachments are towed in groups of up to 4 to maximize efficiency and to limit trips through bay

18. PROPOSED MITIGATION STATEMENT or PLAN: If you believe a mitigation plan is not needed, provide a statement and your reasoning why a mitigation plan is NOT required. Or, attach a copy of your proposed mitigation plan.

Mitigation plan not necessary. BMP's cover relevant hazards. Our vessels are equipped with necessary prevention and containment equipment.

24. SIZE AND FLOW CAPACITY OF BRIDGE/CULVERT and DRAINAGE AREA SERVED: n/a Square Miles

25. IS PROJECT LOCATED IN A MAPPED FLOODWAY? NO YES If yes, contact the floodplain administrator in the local government jurisdiction in which the project is located. A Floodplain Development permit and a No-rise Certification may be required.

26a. WATER QUALITY CERTIFICATION: Pursuant to the Clean Water Act, anyone who wishes to discharge dredge or fill material into the waters of the United States, either on private or public property, must obtain a Section 401 Water Quality Certification (WQC) from the appropriate water quality certifying government entity.

See Instruction Guide for further clarification and all contact information.

The following information is requested by IDEQ and/or EPA concerning the proposed impacts to water quality and anti-degradation:

- NO YES Is applicant willing to assume that the affected waterbody is high quality?
- NO YES Does applicant have water quality data relevant to determining whether the affected waterbody is high quality or not?
- NO YES Is the applicant willing to collect the data needed to determine whether the affected waterbody is high quality or not?

26b. BEST MANAGEMENT PRACTICES (BMP's): List the Best Management Practices and describe these practices that you will use to minimize impacts on water quality and anti-degradation of water quality. All feasible alternatives should be considered - treatment or otherwise. Select an alternative which will minimize degrading water quality

-Consult the County weed Superintendent and Avista on the distribution of aquatic invasive species and noxious weeds in travel lanes. Areas with known infestations will be avoided or treated before being disturbed by travel from the storage area to other sites on the lake.

-Employees are educated and experienced in proper vehicle maintenance.

-Vessels equipped with proper prevention and containment equipment.

-Low Pool areas to be avoided to minimize turbidity.

-Existing "deadhead" logs to remain in-tact and be avoided

-Employees will adhere to rules and regulations from relevant agencies and act in accordance with the clean water act and CDA Lake Management Plan

-Encroachment area clearly designated as no-wake zone and hazardous area due to myriad of "deadhead" logs

-Shorten tow-line to have maximum control over floating encroachments while transporting in and out of Cougar bay

-Maintain low speeds in bay to minimize turbidity

-Educate employees on positioning of deadheads in bay

-maintain consistent paths through bay to minimize disturbance

Through the 401 Certification process, water quality certification will stipulate minimum management practices needed to prevent degradation.

- Question 9 Tax Parcel
 - This location does not have a parcel; however, the applicant owns littoral rights at his property located at 6719 S Highway 97, Coeur d' Alene, ID. Sec. 06 Twp 49 N. R.2 W.B.M. Parcel AIN Number 111552.
- Question 11c., d. and e – Please provide the adjacent Section, Township and Range
 - Property Adjacent to the encroachment is in SE Sec. 15 Twp 50 N. R.4 W.B.M
- Encroachments Not in Aid to Navigation
 - The said encroachment is not in aid of navigation but we do strongly believe our encroachment will provide environmental and economic benefits to the general public. Winter storage is a valuable service provided and hundreds of residents with littoral rights to Coeur d' Alene Lake take advantage of such service every year. In shallow areas, areas that ice over, and areas of the lake susceptible to storms are all detrimental locations to floating encroachments. Encroachments in these areas are at a greater risk to damage that is costly to fix and in extreme cases this damage can cause floating debris. By storing encroachments in a protected area with ample water depth we can help to mitigate the costs and safety hazards associated without having the storage service.
 - The year round work area will include the intermittent storage of miscellaneous docks for repair, resale, and disposal all year-round. Along with repairs this area would be suitable for assembly of modular dock sections that are built off-site. This will benefit the public because it will minimize the actual effect of work being done at their site location. When new docks are installed at the location the old ones need to be disposed of. This is a borderline impossible task for residents on the lake to complete themselves. To alleviate this problem, we dispose of the docks for the customer, but often times the coordination of towing a dock and removing it from the lake in the same day is very difficult. This area would act as a temporary storage area so our crews can re-group with proper and necessary resources to finish the job. Another example of the year round area being a benefit would be in the recovery of derelict and miscellaneous hazards in the form of docks and logs. As cited in the previous scenario, too often, residents are not able to demo their docks when they become beyond repair, there have been plenty of cases when people have detached their dock and sent it into the lake or towed it to uninhabited property during the night. We get the call to take care of these situations. These derelict items need a temporary location to be stored before they can be permanently taken care of. As with removal, sometimes we need a temporary holding area for resources and supplies that are scheduled to go out to different locations on the lake.

- All of the reasons for this year round work and storage area are to the benefit of residents on the lake and the general public. Businesses are only able to operate because they satisfy the needs of their customers. The purpose of this encroachment is to make it possible for our company to continue to serve the needs of our customers, the general public, and different local, state, and federal agencies and departments.

may request. In the event that Tenant should fail to execute any instrument of subordination herein required to be executed by Tenant promptly as requested, Tenant hereby irrevocably constitutes Landlord as its attorney-in-fact to execute such instrument in Tenant's name, place and stead, it being agreed that such power is one coupled with an interest. Tenant agrees that it will from time to time upon request by Landlord execute and deliver to such persons as Landlord shall request a statement in recordable form certifying that this Lease is unmodified and in full force and effect (or if there have been modifications, that the same is in full force and effect as so modified), stating the dates to which rent and other charges payable under this Lease have been paid, stating that Landlord is not in default hereunder (or if Tenant alleges a default stating the nature of such alleged default) and further stating such other matters as Landlord shall reasonably require.

19. Security Deposit.

The Security Deposit shall be held by Landlord without liability for interest and as security for the performance by Tenant of Tenant's covenants and obligations under this Lease, it being expressly understood that the Security Deposit shall not be considered an advance payment of rental or a measure of Landlord's damages in case of default by Tenant. Unless otherwise provided by mandatory non-waivable law or regulation, Landlord may commingle the Security Deposit with Landlord's other funds. Landlord may, from time to time, without prejudice to any other remedy, use the Security Deposit to the extent necessary to make good any arrearages of rent or to satisfy any other covenant or obligation of Tenant hereunder. Following any such application of the Security Deposit, Tenant shall pay to Landlord on demand the amount so applied in order to restore the Security Deposit to its original amount. If Tenant is not in default at the termination of this Lease, the balance of the Security Deposit remaining after any such application shall be returned by Landlord to Tenant. If Landlord transfers its interest in the Premises during the term of this Lease, Landlord may assign the Security Deposit to the transferee and thereafter shall have no further liability for the return of such Security Deposit.
