**Date:** Saturday, June 29, 2019 9:07:13 PM

---

The proposed corporate guarantee of Midas Gold corporation is nothing but a plan to declare bankruptcy and let the public clean up the mess as it had to do so often in the past. The Miners should not have the power to write their own rules to clean up after a disaster. There is going to be long term acid mine drainage problems with the Stibnite proposal and the bonding should be strong enough for the miners to clean it up for the next one thousand years instead of the general public--or not having it cleaned at all. Do not let this proposal go into effect.
