This is the third of 5 scheduled meetings during the public comment period April 3, 2024 – June 5, 2025.

Marde Mensinger presented an overview of rulemaking and reviewed the draft rule changes.

**Discussion:**

- A question was asked about seawall placement relative to the ordinary high water mark. It was explained that as long as the seawall is placed at the ordinary high water mark, there will be no changes to the permitting process. The seawalls may be exposed part of the year, but that does not change the location of the ordinary high water mark.
