---

Dear Comments Idaho Department of Lands,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Regards,  
Barclay Hauber

Dear Idaho Department of Lands, Comments,

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

**Subject:** Stop the unnecessary commercial marina at Trestle Creek

---

Dear Comments Idaho Department of Lands,

I'm concerned about the proposed commercial marina at Trestle Creek - application #L-96-S-2798A. The marina would welcome hoards of new boat traffic, bringing noise, garbage, and the potential for oil and gas leaks to this tranquil and unique habitat. According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. The developer claims that "boat slips and waterfront lots on Lake Pend Oreille are in high demand, with a deficit of availability to current demand." No evidence is offered to support this claim. This marina is not in the public interest; please do not allow it to be permitted!

Development would be disastrous to the endangered bull trout and resident kokanee stocks. It should never be allowed.

Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population! This is one of many special places in Idaho to witness wildlife in its purest form. The value of this land and water is in its plants and animals, not in how much money someone can make destroying it's wildlife and habitat.

Dear Idaho Department of Lands, Comments,

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

Dear Idaho Department of Lands, Comments,

I'm emailing about the Idaho Club's proposal plan for development at Trestle Creek. The ecosystem in place at Trestle Creek is vital for the threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A. By doing this we'll be able to better steward our lake and bull trout population.

Dear Idaho Department of Lands, Comments,

I grew up in Idaho and after traveling the world, I know now how unique it is to have lake Pend Oreille and the streams and rivers that feed and flow from it, remain as healthy as they are. There are endless example of failures to protect our precious waterways in favor of short sighted plans for money making developments. These are all scenarios we can learn from. We can do better! We don't have to make the same mistakes. The Idaho club's plan would permanently scar this landscape. Future generations of people and wildlife will lose an integral part of what makes this area so special. The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. ---

Dear Idaho Department of Lands, Comments,

I'm concerned about the proposed commercial marina at Trestle Creek - application #L-96-S-2798A. The marina would welcome hoards of new boat traffic, bringing noise, garbage, and the potential for oil and gas leaks to this tranquil and unique habitat. According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. The developer claims that "boat slips and waterfront lots on Lake Pend Oreille are in high demand, with a deficit of availability to current demand." No evidence is offered to support this claim. This marina is not in the public interest; please do not allow it to be permitted!

Dear Idaho Department of Lands, Comments,

What the public wants, needs and deserves is access to the lake. The state should not be facilitating anything that benefits the privileged few who can afford waterfront and private boats. Keep Trestle Creek undeveloped - for the bull trout and the people. Please do not approve the proposed commercial marina at Trestle Creek - application #L-96-S-2798A.

Regards,  
Gerth Jean

**Subject:** Stop the unnecessary commercial marina at Trestle Creek

---

Dear Idaho Department of Lands, Comments,

I'm concerned about the proposed commercial marina at Trestle Creek - application #L-96-S-2798A. The marina would welcome hoards of new boat traffic, bringing noise, garbage, and the potential for oil and gas leaks to this tranquil and unique habitat. According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. The developer claims that "boat slips and waterfront lots on Lake Pend Oreille are in high demand, with a deficit of availability to current demand." No evidence is offered to support this claim. This marina is not in the public interest; please do not allow it to be permitted!

**Subject:** Help save critical habitat at Trestle Creek

---

Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Dear Idaho Department of Lands, Comments,

I write in vehement opposition the Idaho Club's application for permits to develop a project at Trestle Creek. There is no benefit to the public or to the ecosystem in their proposal. There is only irreversible damage.

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few.

Please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

Dear Idaho Department of Lands, Comments,

Trestle Creek is my closest favorite beach for swimming and picnic-ing. It is our 'Go To' happy place. It already HAS a place for boats to put in. Trestle Creek does not need another marina. I would seriously focus on the spilling of fuel into the lake for the convenience-pleasure of 88 people, who live just close up the road anyway, should not out-weigh the rest of us who live here and who love and share the lake.

**Subject:** Stop the unnecessary commercial marina at Trestle Creek

---

Dear Idaho Department of Lands, Comments,

I'm concerned about the proposed commercial marina at Trestle Creek - application #L-96-S-2798A. The marina would bring in more boat traffic, bringing noise, garbage, and the potential for oil and gas leaks to this beautiful part of the lake that provides habitat for fish, including spawning bull trout and lake kokanee. According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. They are not even planning to provide public rest rooms. This marina is not in the public interest; please do not allow it to be permitted!

According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. The developer claims that "boat slips and waterfront lots on Lake Pend Oreille are in high demand, with a deficit of availability to current demand." No evidence is offered to support this claim. This marina is not in the public interest; please do not allow it to be permitted!

---

Dear Idaho Department of Lands, Comments,

I'm concerned about the proposed commercial marina at Trestle Creek - application #L-96-S-2798A. The marina would welcome hoards of new boat traffic, bringing noise, garbage, and the potential for oil and gas leaks to this tranquil and unique habitat. According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. The developer claims that "boat slips and waterfront lots on Lake Pend Oreille are in high demand, with a deficit of availability to current demand." No evidence is offered to support this claim. ---

Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

---

Reference: Application No. L-96-S-2798A

If approved, the Marina and Luxury Home development at Lake Pend Oreille's Trestle Creek will destroy a unique ecosystem. This is crazy! I traverse this area a few times per year in my kayak and rue the development that has already occurred in more distant years. If anything, the area should be restored to a more primitive past. To insert more boat traffic and habitat destruction should be unthinkable.

---

Dear Idaho Department of Lands, Comments,

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

Appreciate the IDL giving full and complete consideration for this application. As a resident of Bonner County, that lives on the lake, I support full stewardship and concerns with regard to sensitive habitats and ecosystems. There is likely a sufficient number of slips available through Sandpoint or Hope marinas to support their development. Please give this the utmost attention.

All the best,

Tim Cahill

Dear Gwen,

Once again, we are stating our opposition to The Idaho Club's proposed development of Trestle Creek, near Hope, Idaho. Their intention to take over the whole area at the bottom of the road, extend it so they can add private docks to create their own marina on the lake is totally unacceptable to us as residents of Trestle Creek Rd. Our brother, Greg Wolf, now deceased, was a resident of Trestle Creek and introduced us to the beauty and tranquility of the area. We individually purchased two 10 acre parcels on Trestle Creek Rd, which Trestle Creek also sits on. The Government has an easement on Trestle Creek that prohibits us from fishing or doing any interruption of the stream due to the endangered bull trout that are in it. Yet the Idaho Club is going to be allowed to re-route Trestle Creek into the Lake for a handful of wealthy people and privatize the Trestle Creek Recreational Area that the community uses heavily? We are totally opposed to the destruction of the Trestle Creek area with usurping the stream, taking away our public recreation area, invading the peace and tranquility that we have enjoyed for 29 years.

We want our voices heard. We object to this invasive development on Trestle Creek by The Idaho Club conglomerate.

Thank you,

Douglas and LaUna Wolf

Dear Idaho Department of Lands, Comments,

Planet Earth is at a crucial tipping-point because of the fossil-fuel-fired Climate Crisis.

And the calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life...but for how much longer?

Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few.

To Whom It May Concern:

I live in Hope, ID, just a few miles from Trestle Creek. It has come to my attention that yet again the Idaho Club is proposing to develop the Trestle Creek bull trout and kokanee spawning beds and habitat for Westslope Cutthroat Trout.

Their permit was pulled previously and here they are at it again with new proposals. How can anyone think that putting in a bunch of docks and some homes and filling the lakeshore and mouth of the creek with thousands of yards of gravel and dirt is a good idea? Well someone with dollar signs in their eyes likes the idea. But anyone who loves to watch the kokanee spawning (something you can't see anywhere else in Bonner County to my knowledge) and wants the bull trout, kokanee, and cutthroat trout to prosper would think it is a horrible idea (including bear and eagles).

Let's not let \$\$ make this crucial decision. Let's do the right thing and allow science to save this critical habitat and sanctuary once and for all.

Thank you for your consideration.

Sincerely,  
Cynthia Mason

Dear Idaho Department of Lands, Comments,

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

---

Dear Idaho Department of Lands, Comments,

I'm concerned about the proposed commercial marina at Trestle Creek - application #L-96-S-2798A. The marina would welcome hoards of new boat traffic, bringing noise, garbage, and the potential for oil and gas leaks to this tranquil and unique habitat. According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. The developer claims that "boat slips and waterfront lots on Lake Pend Oreille are in high demand, with a deficit of availability to current demand." No evidence is offered to support this claim. This marina is not in the public interest; please do not allow it to be permitted!

Comment:

I'm writing to ask you to deny the application for a commercial marina at Trestle Creek. This shoreline and habitat is uncommon on Lake Pend Oreille. It's essential habitat for fish and wildlife. It's in everyone's best interest to maintain this ecosystem, rather than seeing it irreparably destroyed for such a superficial project like boat parking.

Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Dear Idaho Department of Lands, Comments,

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

**Subject:** Stop the unnecessary commercial marina at Trestle Creek

---

Dear Idaho Department of Lands, Comments,

I'm concerned about the proposed commercial marina at Trestle Creek - application #L-96-S-2798A. The marina would welcome hoards of new boat traffic, bringing noise, garbage, and the potential for oil and gas leaks to this tranquil and unique habitat. According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. The developer claims that "boat slips and waterfront lots on Lake Pend Oreille are in high demand, with a deficit of availability to current demand." No evidence is offered to support this claim. This marina is not in the public interest; please do not allow it to be permitted!

Dear Idaho Department of Lands, Comments,

I'm concerned about the proposed commercial marina at Trestle Creek - application #L-96-S-2798A. The new proposal would entail removing part of the existing island, as well as the existing main shoreline and parts of the interior of the peninsula for a total excavation of 12,500 cubic yards across 3.2 acres. They would harden 3,830 feet of shoreline. This would be devastating for this most important bull trout habitat and be an absolute negative for this area of Lake Pend Orielle. According to Idaho's Lakes Protection Act, commercial marina moorage for use by the general public may not require membership in a club or organization. It is unclear why the Idaho Club would want to develop a marina and not give preference to their owners and members. There is no assurance that they will not. The developer claims that "boat slips and waterfront lots on Lake Pend Oreille are in high demand, with a deficit of availability to current demand." No evidence is offered to support this claim. This marina is not in the public interest; please do not allow it to be permitted!

Dear Idaho Department of Lands, Comments,

As a visitor to the Lake Pondera region over the years, I have enjoyed the beauty of the region. Too often , Idaho's beauty is now falling prey to unchecked development for the financial gain of a few. Maintain a more future looking stance and one that actually supports what the MAJORITY of people want for this region, and deny this or any other form of development in the Trestle Creek area.

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

Re: Application No. L-96-S-2798A

Does public support mean anything?

Approval of new boat docks, marina, and amassed accessories, regarding the proposed Trestle Creek development makes a joke out of any conservation effort told to the public.

We have heard for years about endangered Bull Trout species - being able to identify and if caught release. Now the developers, and people with money, think they can do anything and get their way. They just keep coming back and back not taking no for an answer, until their money gets their way.

Once the damage is done - it is done - no matter how many computer programs say it is alright. Let them trailer their boats. Why can they come to a pristine place, kept that way for years, and figure they can change the laws and rules and dis-regard mother nature? Should the governmental department overseers, cave into the elite one percenters, and allow such devastation, I will never take another claim, put forth by any governmental department, seriously about anything again.

Please do not let these developers, and high money interest folks, ruin a good thing, whatever their high deficit demands claim. They can move - or go to another lake that doesn't pose a major problem to the ecosystem.

Thank-you for reading and listening.
