Anything that damages or interrupts the natural flow of Trestle Creek is unacceptable!

There is nothing more important to maintain the health of Pend' O'Reille Lake than to maintain the health of our native fish.

If one values the blessings of "Mother Nature", then one must also fight to retain those blessings.

**DO NOT ALLOW THIS HABITAT TO BE DESTROYED!**

I understand that IDL's mandate is to make decisions based on what is in the public interest. As part of the public, I definitely say this is not in my interest. The lower reaches of Trestle Creek are critical for Bull Trout. I also enjoy kayaking in that area and increased motor boating will be a huge negative impact.

**Subject:** Comments on Idaho Club Trestle Creek Project

---

As I'm unable to attend the public hearings on the above project Oct 7 and 8, I am submitting my comments here.

I am a 35 year Trestle Creek resident and home owner. I feel this project is a very bad idea and will create a multitude of problems for the pristine Trestle Creek water way and ecosystem. There's a reason all the previous proposals failed. All the arguments for this kind of development have not changed. An 88 slip marina and parking lot and necessary restrooms and houses with docks that are proposed will ruin the beauty and fish habitat of this special area. All of this is antithetical to the ongoing Pack River delta restoration. Please deny this proposal!

Marcia A Morris

Your Comment: Please do NOT permit marina development and lake bed alteration at the mouth of Trestle Creek. Trestle Creek will best serve public trust values if left intact and undisturbed. ( note application No. L-96-S-2798A) This development would significantly impact habitat available to bull trout, Kokanee salmon and other species. The eagles that nest along this lake area will also be impacted. Please deny Idaho Club and other developers from endangering the water and wildlife our lake and area need. Please protect this special place and critical habitat.

Your Comment: In regards to the Trestle creek development, This is a bad idea for the creek, the fish, and the environment. It should not be approved on any one of those issues.
