Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Regards,  
Justine murray

Dear Idaho Department of Lands, Comments,

I don't even live in Sandpoint anymore, I don't even have plans to come back to Sandpoint in the near future. However, I did spend about half of my life there and Sandpoint made me who I am today. Sandpoint is a small piece of a paradise in a horrible, horrible world. I can assure you the locals are what makes Sandpoint, Sandpoint. With everything else going on, high living expenses, the ecosystem being extremely impacted by this decision, etc., locals are being driven out of town every day. Don't give them another reason. Without the locals there is no Sandpoint. It's a domino effect. Now that I'm living back on the east coast I look at the mountains and rivers here and say "man... I wish I could see Sandpoint again..." don't fix what's not broken. 7B has a piece of my heart for life.

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Dear Idaho Department of Lands, Comments,

I have strong concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. Over the past 17 years the Idaho Club has applied for permits to develop this area. The proposal is to build a marina for 88 boats, a break water, pedestrian bridge, parking lot and seven houses with private docks. Such a development will erode the recovery of threatened bull trout. Trestle Creek is one of the few places where families (including my family, two generations worth) can easily observe spawning bull trout and kokanee salmon. Teachers have been bringing their students for decades to watch the wonder of these fish spawning and witness first hand an important part of native fish life cycles. Idaho Club has failed three times to gain permits to advance developmental carnage to this special (and to many, a sacred) place. Please do not allow a commercial marina to erode the public trust and the value a healthy bull trout population!

**Subject:** Help save critical habitat at Trestle Creek

---

Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Regards,  
Kim Walker  
PO Box 441  
Hope, ID 83836

I myself take my step children here often and it is indeed one of the last local places to get out i to nature! It is special and needs to be preserved for future generations to enjoy freely
