Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Regards,
Michelle Adams

Subject: Help save critical habitat at Trestle Creek

Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. The bull trout will be fine either way. I am suspect of any individual or organization working toward undermining the use that they rightfully own(or have exclusive access to). The location is clearly extraordinary and something that is worthy of special consideration. A rational minded man does not level something for a terrific tax advantage and investment vehicle guaranteed to be limited in future use. I would green light people in the area working to further foreign or Corporate interests to clear cut and dredge and steward it for a short while over a future of loss as a bank owned asset. There could be extensive permitting for future demolition activities initiated by; diminished value, depreciation costs or current tax policy. Many of the investment decisions are nonsense and the costs are tallied and applied to whoever gets roped in. The person responsible for signing the paperwork for the loan package should purchase a kayak and enjoy the recreational property that he is responsible for. Thank you for your service in consideration of such complicated matters.

I spent a lot of my childhood at trestle creek as my grandpa lived in hope. My mother went to school in that are and has so many memories as do I it's a wonderful place for families. We don't need luxury homes. There is very few places we can go to enjoy the beauty anymore on lakes.

Subject: Help save critical habitat at Trestle Creek

Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Regards,
Randy Fox
