Subject: Help save critical habitat at Trestle Creek

Dear Idaho Department of Lands, Comments,

I'm writing to express my concerns about the proposed marina at Trestle Creek - application #L-96-S-2798A. This development will undermine the recovery of threatened bull trout. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon. Watching these bright red fish build their nests to lay their eggs before they die is to witness the cycle of life unfolding before our eyes. Teachers have been bringing 5th grade students to view the phenomenon on Trestle Creek every fall for years. Please do not allow a commercial marina to undermine the public trust values of a healthy bull trout population!

Regards,
Shalene McNeese

Dear Idaho Department of Lands, Comments,

The proposed marina at Trestle Creek - application #L-96-S-2798A—would undermine the recovery of threatened bull trout if this ill-founded project is permitted to proceed. Trestle Creek is one of the few places where families can easily observe spawning bull trout and kokanee salmon, providing valuable life lessons for students and families. Many remember their 5th grade field trip to Trestle Creek and the lessons it brought them. Please do not allow a commercial marina to undermine the public trust nor the healthy bull trout population!

I am not in favor of this project. I can not image that 88 boat slips would not endanger the fish habitat. The building alone would be bad enough not to mention the disturbance of boats coming and going spewing oil and gas along the way, right at the mouth of the creek. That can't be good for the fish. Bull trout are already endangered and now we will make it harder for them. We all know those slips will go to the Idaho Club housing development so it is not even for the general public.

Please don't allow this to go forward

Sincerely

Sherry Witcraft

Subject: IDAHO CLUB Trestle Creek project

CAUTION: This email originated outside the State of Idaho network. Verify links and attachments BEFORE you click or open, even if you recognize and/or trust the sender. Contact your agency service desk with any concerns.

This email is to protest the Idaho Club's proposal to develop at the mouth of Trestle Creek. This project is a bad idea for so many reasons. This will negatively impact the fish spawning area and prioritize private monied interests over the interests of birds, animals and fish in the area. The interests of local residents for a pristine lake and shoreline would also be undermined.

To IDL:

I have been a resident of Sandpoint, Idaho since 1980. My family has enjoyed the lake and mountains throughout our life here. We have been avid sailors, kayakers and hikers. We have seen our lake deteriorate over the last 20 years from housing and development on the lake. We are opposed to more development on the lake, especially in the Trestle Creek drainage area. This area was set aside for wildlife, fish and bird habitat. PLEASE DO NOT LET THE IDAHO CLUB USE \$\$ AND GREED TO SWAY IDL TO ALLOW THIS DEVELOPMENT !!! This WILL affect the kokanee, the Bull trout, and the birds of prey whose lives depend on this habitat for their survival too! We must be the voice to protect a place for nature to thrive, and survive, not just wealthy investors. We moved here to enjoy the natural beauty of this area which includes ALL life that lives in and around this beautiful lake.

Please listen, and stop the Idaho club's proposal.

Sincerely, Joyce and Marc DeLaVergne

To Whom it May Concern,

I am writing concerning application # L-96-S-2798A.

This proposal benefits only a very few people and yet has great detrimental and long standing effects on water quality and spawning habitats for Bull Trout and Kokanee Salmon. Please do not allow this very special place with critical habitat to be developed. Please do consider the ecological importance of Trestle Creek. It must be preserved for future generations.

Thank you for your time,

Sincerely,

Meryl Katin

Subject: No to Idaho Club Testle Creek project

So much money has been spent trying to improve/restore the Pack River Delta, why would you agree on such an unnecessary project that gives a select group of people the right to possibly upend all that.

For the sake of the Kokanee, the waterfowl, the wildlife and the people who enjoy living quietly in this area, please stop the Idaho Club from ruining this majestic place.

Sincerely

Kathie Grzik

Subject: proposed development at Trestle Creek--application #L-96-S-2798A.

I'm somewhat dumbfounded that the Idaho Club, having been turned down three times, has applied yet again to "develop" property at the mouth of Trestle Creek. It would be one thing if they were just building large houses on lots that exist, but their plan to move a channel of the creek, and move thousands of tons of soil and rock into the lake, reveals that they intend to fundamentally change the landscape.

Trestle Creek is an important spawning area for the lake's fish, and they offer no reassurance that the spawning run will be protected. It doesn't make sense to risk a precious public natural resource for the benefit of the privileged few who will be able to buy the homes.

Please turn down this application once again, and try to convince these people, once and for all, that this project is not appropriate for Lake Pend Oreille.

Subject: Proposed Trestle Creek Development

Gentlepeople,

I testified at the hearing in-person when the original proposal on Trestle Creek was made. I cannot make the hearing tonight or tomorrow because I am sick. Below are my official comments:

I am OPPOSED to the proposal in all of its modifications. As the author of *Legendary Lake Pend Oreille*, published by Koeke Books and the comprehensive book about our lake and area, including 50 pages of this 450 page book on the Kalispel Tribe, vetted by the Tribal Council. You must deny this application in its entirety. Inform the applicant that it is inappropriate for several reasons, for cultural reasons (pg. 164 of my book) — “The area from Pack River to Hope is one of two (the other being the Clark Fork Delta) of the most important locations on Lake Pend Oreille to the Tribe because of nature’s abundance of fish and wildlife.” Trestle Creek specifically was both fished in spring as well as summer and fall. Deer and bear were hunted in the adjacent mountains. This place was one of the most important hunting and fishing camps for both the Upper and Lower Bands of Kalispel.

My suggestion is that the applicant gift the land they now own to the Kalispel Tribe on behalf of all the native and nonnative people who live here, and that IDL support this idea. We simply don’t know when to leave sacred and special wild habitats undeveloped, especially Trestle Creek, home to spawning kokanee salmon.

Nothing about this proposal is positive and should be denied in its entirety. Rich people coming in don’t know when to quit ruining our lake with their toys, their marinas and their ostentatious homes. This Lake Pend Oreille was lived around and cared for for 10,000 years. Trestle Creek is also a public area for the rest of us which I write about in my book as well. So many people enjoy kayaking this undeveloped and beautiful area.

Secondly you must deny this proposal because of its negative impacts to nature. I’m writing now as an advocate and an environmental podcaster, public radio producer (mythweaver.org) and protector of the wildlife in this area. Non-human beings have no voice with IDL and the developers don’t care about wildlife one bit; they only care about themselves and money. I’ve watched so many places around the Lake be destroyed and this has got to stop. And it should stop here with this Trestle Creek proposal.

Please protect one of the last wild streams on our Lake, Indigenous homeland, and the fish and wildlife species that deserve a place to live without human disturbance and destruction for only human benefit. Read in my book on page 165 the story “Wildlife Through the Seasons” by fellow writer, Heather McElwain. You will realize what a refuge Trestle Creek is for the natural world if you do.

Thank you for considering my comments in earnest. I hope you will do the conscionable thing for the Kalispel Tribe and for all future generations and all the wild beings there. Deny this proposal!

Dear Idaho Department of Lands, Comments,

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.
