**Subject:** Save Trestle Creek

---

I live on Trestle Creek and in the 8 years I have lived here I have seen the impact of just a couple new home and building including the new fish and game building. There used to be deer and elk everywhere around Trestle Creek and in the last couple of years you'd be lucky to see anything. I can only imagine what devastating impacts more development would have. I moved up here to be in nature.

The concrete is quickly moving into the natural habitats we all moved up here for.

I fully oppose more development.

Thanks

Jeff Stabler

Dear Idaho Department of Lands, Comments,

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

Dear Idaho Department of Lands, Comments,

Trestle Creek is a unique ecosystem that is teeming with life. Fish and wildlife are abundant, including eagles, beaver and bull trout. Trestle Creek can account for more than half of bull trout spawning in the entire Pend Oreille Basin, making it our region's most important spawning area for this threatened fish (under the U.S. Endangered Species Act). Trestle Creek also accounts for more than half of Lake Pend Oreille's kokanee spawning beds. It is one of the only places in our region where families can easily observe spawning bull trout and kokanee salmon.

This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish.

It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few, as a commercial marina would surely do.

Therefore, I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

Dear Idaho Department of Lands, Comments,

Trestle Creek is the last natural inlet into Lake Pend Oreille. All others have been altered by roads and private or public development. It's a special place where Kokanee and Bull Trout spawn every year. Avista Utility Company has made a section of the creek just upstream from its mouth a protected space for these fish to begin new life. It has been a non-motorized boating zone for years, and this non-motorized area would be spoiled and polluted if Valiant Idaho is allowed to dredge the creek, and build a marina development, only to further the commercial interests of a few wealthy elites, who find no value in unspoiled habitat. The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

Dear Idaho Department of Lands, Comments,

The calm, cool water and wild landscape of the unique ecosystem at Trestle Creek is currently teeming with life. Fish and wildlife are abundant, including eagles, beaver and threatened bull trout. This type of intricate shoreline and quiet refuge is uncommon on Lake Pend Oreille, as the shoreline is typically steep and deep without a lot of variation that offers critical safety zones for animals and fish. It's in the public's best interest to maintain this unique and diverse ecosystem, rather than seeing it destroyed for the financial benefit of a few. I'm writing to ask that you please deny the application for a commercial marina at Trestle Creek - application #L-96-S-2798A.

Regards,  
Shea Kilpatrick  
402 N Florence Ave  
Sandpoint, ID 83864

---

Writing for my opinion on this ridiculous proposal from the Idaho club. They can stick to the links. 3rd go around here and hopefully the final. Shut this idea/ proposal down. Immediately. How is it that people that moved here get to dictate what goes on here ? They get to but power ? They sre okay with destroying natual habitats to create theor own temporary habitat ? At a big cost. Leave trestle creek as it is. Stop developments for people that dont even know how to winter here. Plenty of other things at play and factors that are messing up the ecosystems of north idaho. Dont let this be another mistake. The creek and the fish population and maintaining that area as it has been should be the only subject here. Do not let these people tear up a special needed ecosystem in this state.
