Navigable Waterways IDL,

A couple concerns from the Bonner County Waterways Maintenance crew will be the following:

- 1) This project will most likely require additional no-wake buoys, is it possible given Bonner County's limited budget, that if this marina expansion happens, that they cover cost and maintenance of regulatory buoys?
- 2) Will this interfere with navigation of water and access when levels are reduced?
- 3) Will the impact from this project cause shift in water pattern which could increase the collection and hazards and debris? (logs, floating docks, garbage, etc) If so, who will pay to maintain?

Best,

--
