State permits are required under the State of Idaho, Stream Protection Act (Title 42, Chapter 38, Idaho Code and Lake Protection Act (Section 58, Chapter 13 et seq., Idaho Code). In addition the information will be used to determine compliance with Section 401 of the Clean Water Act by the appropriate State, Tribal or Federal entity.

All existing emergent and forested wetlands would be preserved. The overall restoration project is expected to protect wetland habitats from erosion due to operation of hydroelectric projects on the Clark Fork River and Pend O'reille River and increase wildlife habitat diversity and habitat complexity. Since the overarching goal of this project is to mitigate for wetland habitat loss, a separate mitigation plan is not needed.
