   DISCUSSION: Governor Otter inquired if there was going to be any duty on saw logs, noting that 200 MMBF of stumpage comes into Idaho, but he is not aware how much of that comes from Canada. Director Schultz replied that between 100-200 MMBF per year comes into Idaho to be processed, but he is not sure how much of that is from Canada. Director Schultz stated logs also come from Oregon, Washington and Montana. Director Schultz said that the Department would research the issue and get back to the Land Board.

D. Cottage Site Update

E. LSO Audit Summary
2. **Endowment Fund Investment Board Manager’s Report** – Presented by Dean Buffington, EFIB Chairman, and Larry Johnson, EFIB Manager of Investments

*DISCUSSION:* Chairman Buffington stated that today is one of two regularly scheduled meetings of the Investment Board with the Land Board. Chairman Buffington introduced Investment Board members in attendance: Representative Neil Anderson, Warren Bakes, Gary Mahn, Richelle Sugiyama and the two newest members, Jerry Aldape and Mary Hughes. Chairman Buffington noted the absence of Senator Chuck Winder due to travel, but commented that the Senator would be joining the Investment Board meeting later that day via teleconference. Chairman Buffington then introduced Larry Johnson.

A. Manager’s Report

*DISCUSSION:* Mr. Johnson first introduced representatives from Callan Associates: Janet Becker-Wold and Sally Haskins. EFIB staff members Chris Halvorson, Michelle Watts and Liz Wienke were in attendance as well.

Mr. Johnson reported that distributions are well-secured. Reserves average 5.5 years and are in good shape, and there were no significant actions to report.

B. Investment Report

*DISCUSSION:* Mr. Johnson reported that both equity and fixed income markets were up during April. The total fund was up 1.3%, and the fiscal year-to-date return through April was at 10.6%. Mr. Johnson remarked that this was good, relative to long-term expectations of a little over 6% return.

Governor Otter wondered why 10.6% was printed in red on the report. Mr. Johnson explained that it is compared to 10.9%, which is the benchmark to measure how active managers are adding value or not adding value. Mr. Johnson commented that this last fiscal year-to-date, there was not added value and that is why the number is in red. Mr. Johnson continued on to say that the Fund is up almost one percent through yesterday and that the fiscal year-to-date number is now hovering around 11.6%.

C. Semi-Annual Report

*DISCUSSION:* Mr. Johnson remarked that the Endowment Fund balance for the first nine months increased 7.5%, or almost $137 million; the Fund balance now stands at almost $2 billion. Earnings reserves are even with year-end, even with the $47 million that was transferred back to principal to offset inflation and population growth. Earnings reserves received from endowment lands are up 11% for the same period in 2016 and the total investment return for 9 months was 9.3%. Mr. Johnson commented that all of the coverage ratios, which estimate how many years of distributions are in reserve to protect against a downturn in land income or fund income, are at or above the target level that the Investment Board believes is the maximum reserves needed. In a comparison of Endowment Fund performance versus other public plans, over the last 10 years, seven years, and five years, the Endowment Fund ranking has been above average.
Mr. Johnson mentioned the School Bond Credit Enhancement Program, which boosts the ratings of school bonds to the highest possible rating — AAA. Mr. Johnson noted that the state also has a guarantee program, but it can only guarantee to the level of the state's credit rating, which is AA+; this is the second best possible rating. Mr. Johnson commented that the AAA rating saves about .05% in interest rates on average; this adds up to a lot of money over the life of the bond. Mr. Johnson stated that this credit issuance is backed by a pledge of $300 million of the assets of the Public School Endowment Fund. The Investment Board guarantees to bondholders that it will make a payment if the school district cannot, guaranteeing payments of approximately $50 million per year on over $400 million of outstanding debt.

Governor Otter asked if a payment has ever been made. Mr. Johnson responded no, and as far as he knows, there is no school in the nation that has permanently defaulted on a school bond. Mr. Johnson described that there have been some rare circumstances under which guarantors had to temporarily make payments; for instance, following Hurricane Katrina when taxpayers left and no property taxes were paid. Districts did not have the money to make the payments; however, people moved back, industry restarted, the districts caught up on payments and repaid guarantors. Mr. Johnson stated that is what may happen under the Investment Board's credit program, but there is no real permanent risk of loss. Mr. Johnson noted that the Investment Board charges a fee to compensate the Fund for making a non-cancellable guarantee, which generated about $18,000 of income over the last 10 1/2 months. Issuers save between 5-15 times the fees paid for that guarantee in terms of lower interest rate.
