---

My name is Lynn Lewinski.  
I am a resident of McCall Idaho.  
While my concerns are many, I will attempt  
to be very direct.

Turning our lands over to private or corporate or  
international money making endeavors is wrong  
for many reasons and on so many levels.  
These lands should be held for future endowment  
to secure the given trusts of nature due to all.

The Idaho Department of Lands has spent time  
and energy attempting to secure the future of  
Idaho taxpaying citizens as well as the lands,  
the flora and fauna and the integrity of our  
heritage in the fundamentals of basic needs.  
These additions to House Bill 144 should be  
respected and if possible, re-enforced and strengthened.  
A wolf (aka mining) in lambs clothing (aka  
the taxpayers of Idaho) is never to be trusted.  
Self-bonding history has failed to meet many  
commitments, leaving our communities and state  
with burdensome responsibilities, as well as great  
anxiety and demise of a healthy area for the  
promises of short term gains.

Do not allow money to influence the loss of what  
makes Idaho our treasure. Idaho is one of the last  
great gems. Do not let Idaho be stolen!

Concerned, Lynn Lewinski
